

Free Developmental Screening

Forsyth County Schools
Georgia Department of Education

"Every child is a story yet to be told."

Forsyth County School District's Division of Special Education is responsible for locating, identifying, and evaluating any children with known or suspected disabilities who reside within the school district's boundaries to determine whether a need for special education and related services exists.

**Are you concerned about your child's speech and language development?
When your child is playing with his peers, does he seem to be behind in
play skills or social interaction?
Is your child struggling with pre-academic skills such as recognizing
his/her name, colors, shapes, letters?
Is your child unable to manipulate simple playground equipment or
classroom writing/art materials?**

Forsyth County School District is offering free monthly screenings for children ages 3 to 5 (prior to entering kindergarten) to determine the need for early intervention support and services. Your child will be screened for hearing and vision, articulation and language, motor skills, cognitive skills, and adaptive/social skills. This screening will last approximately one hour, and parents must be present with their child at all times. The team will consist of special education personnel, an audiologist, and a speech-language pathologist.

Developmental Screenings will be held the first Friday of every month from 9-12 at the Hill Center. You must call or email to schedule an appointment.
