

### G1-M1-Lesson 38

Find and solve the addition problems that are doubles and 5-groups.

Make subtraction flashcards for the related subtraction facts. (Remember, doubles will only make 1 related subtraction fact instead of 2 related facts.)

Make a number bond card, and use your cards to play Memory.

$5 + 0$	$5 + 1$	$5 + 2$	$5 + 3$	$5 + 4$	$5 + 5$
$6 + 0$	$6 + 1$	$6 + 2$	$6 + 3$	$6 + 4$	
$7 + 0$	$7 + 1$	$7 + 2$	$7 + 3$		
$8 + 0$	$8 + 1$	$8 + 2$			
$9 + 0$	$9 + 1$				
$10 + 0$					

$5$  and  $5 = 10$  is a double fact and uses a 5-group. Both addends are 5.

$5 + 4$  uses a 5-group since 5 is one of the addends. I'll make the subtraction flashcards  $9 - 5 = 4$  and  $9 - 4 = 5$ . This row has more facts that use a 5-group.

$$5 + 4 = 9$$

$$9 - 4 = 5$$

5 and 4 are the parts that make 9.

$$9 - 5 = 4$$
