

Grades 6-8, Claim 4

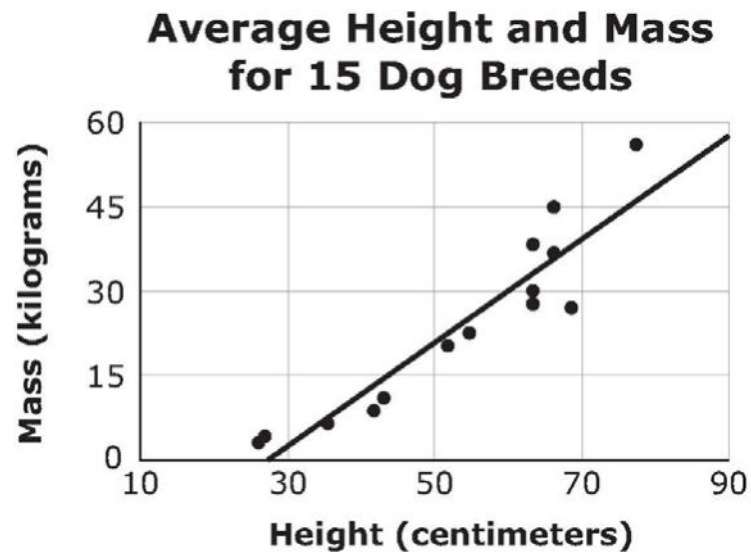

Example Item 4D.1b (Grade 8)

Primary Target 4D (Content Domain SP), Secondary Target 1J (CCSS 8.SP.A), Tertiary Target 4E

This scatter plot and line of best fit show the relationship between the height and mass of 15 different dog breeds.

The mass of the Afghan Hound is less than would be predicted by the line of best fit, and the difference between the predicted mass and the actual mass is greater than for any other breed.

Click on the point in the scatterplot that corresponds to the Afghan Hound.

Rubric: (1 point) The student clicks the point that below and farthest away from the graph (see figure).

Response Type: Hot Spot
