

Georgia Assessments for the Certification of Educators® (GACE®) Program Admission Assessment – Test II Mathematics

Khan Academy Instructional Support Videos and Exercises

The Georgia Assessments for the Certification of Educators® (GACE®) program has identified videos and exercises available at www.khanacademy.org to support test preparation for the Program Admission Assessment – Test II Mathematics. Each subarea included in the test is mapped to a video or exercise that may help you prepare to answer questions related to that topic.

GACE Program Admission – Test II Mathematics (201)		Khan Academy videos
Subarea I: Number and Quantity		
• Ratios and Proportional Relationships		
– Understand ratio concepts and use ratio reasoning to solve problems		<u>Intro to ratios</u> <u>Ratio word problems</u> <u>Intro to rates</u> <u>Ratio word problem: centimeters to kilometers</u>
– Analyze proportional relationships and use them to solve real-world and mathematical problems		<u>Intro to percents</u> <u>Percent, fraction, decimal conversions</u> <u>Percent problems</u> <u>Percent word problems</u> <u>Identifying proportional relationships</u> <u>Average rate of change</u> <u>Average rate of change word problems</u> <u>Writing & solving proportions</u>

	<u>Writing & solving proportions</u>
<ul style="list-style-type: none"> • The Real Number System 	
<ul style="list-style-type: none"> – Apply understanding of multiplication and division to divide fractions by fractions 	<u>Fractions intro</u> <u>Fractions on the number line</u> <u>Equivalent fractions</u> <u>Comparing fractions</u> <u>Common denominators</u> <u>Decomposing fractions</u> <u>Adding and subtracting fractions with like denominators</u> <u>Mixed numbers</u> <u>Adding and subtracting fractions with unlike denominators</u> <u>Adding and subtracting mixed number with unlike denominators</u> <u>Adding and subtracting fractions word problems</u> <u>Multiplying whole numbers and fractions</u> <u>Multiplication as scaling</u> <u>Multiplying fractions</u> <u>Multiplying mixed numbers</u> <u>Multiplying fractions word problems</u> <u>Fractions as division</u> <u>Dividing unit fractions and whole numbers</u> <u>Dividing fractions by fractions</u> <u>Dividing fractions word problems</u> <u>Fractions</u>
<ul style="list-style-type: none"> – Compute fluently with multi-digit numbers and find common factors and multiples 	<u>Place value</u> <u>Rounding whole numbers</u> <u>Regrouping whole numbers</u> <u>Divisibility tests</u> <u>Factors and multiples</u> <u>Prime numbers</u> <u>Prime factorization</u> <u>Least common multiple</u> <u>Greatest common factor</u>

	<u>Intro to decimals</u> <u>Decimals on the number line</u> <u>Rounding decimals</u> <u>Comparing decimals</u> <u>Rewriting decimals as fractions</u> <u>Adding decimals</u> <u>Subtracting decimal</u> <u>Adding and subtracting decimals word problems</u> <u>Multiplying decimals</u> <u>Dividing decimals</u> <u>Operations with decimals</u> <u>Intro to negative numbers</u> <u>Order negative numbers</u> <u>Number opposites</u> <u>Negative numbers</u> <u>Intro to adding negative numbers</u> <u>Intro to subtracting negative numbers</u> <u>Adding & subtracting negative numbers</u> <u>Multiplying & dividing negative numbers</u> <u>Absolute value</u> <u>Decimals, fractions and percentages</u>
<ul style="list-style-type: none"> – Apply understanding of operations with fractions to add, subtract, multiply, and divide rational numbers 	<u>Order of operations</u> <u>Arithmetic properties</u> <u>Distributive property</u> <u>Number patterns</u>
<ul style="list-style-type: none"> – Know that there are numbers that are not rational, and approximate them by rational numbers 	<u>Rational and irrational numbers</u>
<ul style="list-style-type: none"> – Work with radicals and integer exponents 	<u>Exponents</u> <u>Square roots</u> <u>Cube roots</u> <u>Exponent properties</u> <u>Negative exponents</u> <u>Scientific notation</u> <u>Orders of magnitude</u>

	<u>Computing with scientific notation</u> <u>Negative exponents</u> <u>Exponent properties</u> <u>Scientific notation intro</u> <u>Scientific notation word problems</u>
<ul style="list-style-type: none"> Quantities 	
<ul style="list-style-type: none"> Reason quantitatively and use units to solve problems 	<u>Intro to dimensional analysis</u> <u>Dimensional analysis for converting</u> <u>Dimensional analysis for proportional reasoning</u> <u>Word problems with multiple units</u> <u>Determining precision in descriptive modeling</u>
Subarea II: Algebra and Functions	
<ul style="list-style-type: none"> See Structure in Expressions 	
<ul style="list-style-type: none"> Apply understanding of arithmetic to algebraic expressions 	<u>Intro to variables</u> <u>Introduction to variables</u> <u>Substitution & evaluating expressions</u> <u>Substitution & evaluating expressions</u> <u>Expression value intuition</u> <u>Constructing numeric expressions</u> <u>Evaluating expressions word problems</u> <u>Introduction to sequences</u> <u>Introduction to arithmetic sequences</u> <u>Constructing arithmetic sequences</u> <u>Introduction to geometric sequences</u> <u>Constructing geometric sequences</u> <u>Modeling with sequences</u>
<ul style="list-style-type: none"> Solve real-life and mathematical problems using numerical and algebraic expressions 	<u>Writing algebraic expressions introduction</u> <u>Writing basic algebraic expressions word problems</u> <u>Writing algebraic expressions</u>

<ul style="list-style-type: none"> Use properties of operations to generate equivalent expressions 	<u>Combining like terms</u> <u>Distributive property</u> <u>Equivalent algebraic expressions</u> <u>Nested fractions</u> <u>Adding & subtracting polynomials</u> <u>Multiplying binomials</u> <u>Special products of binomials</u>
<ul style="list-style-type: none"> Reasoning with Equations and Inequalities 	
<ul style="list-style-type: none"> Understand the connections between proportional relationships, lines, and linear equations 	<u>Slope</u> <u>Slope-intercept form intro</u> <u>Writing slope-intercept equations</u> <u>Interpreting linear functions and equations</u> <u>Comparing linear functions</u> <u>Constructing linear models for real-world relationships</u> <u>Linear models word problems</u> <u>Graphing proportional relationships</u>
<ul style="list-style-type: none"> Understand solving equations as a process of reasoning and explain the reasoning 	<u>Algebraic equations basics</u> <u>One-step equations intuition</u>
<ul style="list-style-type: none"> Reason about and solve one-variable equations and inequalities 	<u>One-step addition & subtraction equations</u> <u>One-step multiplication and division equations</u> <u>One-step equations</u> <u>One-step equation word problems</u> <u>Inequalities: Greater than and less than basics</u> <u>One-step inequalities</u>
<ul style="list-style-type: none"> Solve equations and inequalities in one variable 	<u>Two-step equations intro</u> <u>Multi-step equations</u> <u>Two-step inequalities</u> <u>Multi-step inequalities</u> <u>Solutions to two-variable linear equations</u> <u>Linear equations with unknown coefficients</u> <u>Compound inequalities</u>

<ul style="list-style-type: none"> Analyze and solve linear equations and pairs of simultaneous linear equations 	<u>Coordinate plane</u> <u>Solutions to two-variable linear equations</u> <u>x-intercepts and y-intercepts</u> <u>Systems of equations intro</u> <u>Graphical representation of systems of equations</u> <u>Elimination method for systems of equations</u> <u>Substitution method for systems of equations</u> <u>Solving any system of linear equations</u>
<ul style="list-style-type: none"> Represent and solve equations and inequalities graphically 	<u>Graphing two-variable inequalities</u> <u>Point-slope form</u> <u>Standard form</u>
<ul style="list-style-type: none"> Functions 	
<ul style="list-style-type: none"> Interpreting Functions 	<u>Introduction to functions</u> <u>Evaluating functions</u> <u>Inputs and outputs of a function</u> <u>Functions and equations</u> <u>Interpreting function notation</u> <u>Introduction to the domain and range of a function</u> <u>Determining the domain of a function</u>
<ul style="list-style-type: none"> Building Functions 	<u>Recognizing functions</u> <u>Intervals where a function is positive, negative, increasing, or decreasing</u> <u>Interpreting features of graphs</u>
Subarea III: Geometry	
<ul style="list-style-type: none"> Congruence 	
<ul style="list-style-type: none"> Draw, construct, and describe geometrical figures and describe the relationships between them 	<u>Lines, line segments, and rays</u> <u>Measuring segments</u>

	<u>Parallel and perpendicular</u> <u>Points, lines, & planes</u> <u>Geometric definitions</u> <u>The golden ratio</u> <u>Properties of shapes</u> <u>Classifying geometric shapes</u> <u>Triangle types</u> <u>Triangle inequality theorem</u> <u>Quadrilateral types</u>
<ul style="list-style-type: none"> Experiment with transformations in the plane 	<u>Coordinate plane</u> <u>Triangle similarity intro</u> <u>Solving similar triangles</u> <u>Coordinate plane: quadrant 1</u> <u>Coordinate plane: 4 quadrants</u> <u>Quadrants on the coordinate plane</u> <u>Reflecting points on coordinate plane</u> <u>Quadrilaterals on the coordinate plane</u> <u>Drawing polygons in the coordinate plane</u> <u>Introduction to rigid transformations</u> <u>Translations</u> <u>Rotations</u> <u>Reflections</u> <u>Dilations or scaling around a point</u> <u>Sequences of transformations</u> <u>Properties and definitions of transformations</u> <u>Symmetry</u>
<ul style="list-style-type: none"> Similarity, Right Triangles, and Trigonometry 	
<ul style="list-style-type: none"> Understand and apply the Pythagorean theorem 	<u>Pythagorean theorem</u> <u>The Pythagorean theorem</u>
<ul style="list-style-type: none"> Circles 	

<ul style="list-style-type: none"> – Understand and apply theorems about circles 	<u>Circumference and area of circles</u> <u>Area and circumference of circles</u> <u>Circle basics</u> <u>Arc measure</u> <u>Arc length (degrees)</u> <u>Sectors</u>
<ul style="list-style-type: none"> • Geometric Measurement and Dimension 	
<ul style="list-style-type: none"> – Solve real-life and mathematical problems involving angle measure, area, surface area, and volume 	<u>Angle introduction</u> <u>Measuring angles</u> <u>Constructing angles</u> <u>Angles in circles</u> <u>Angle types</u> <u>Vertical, complementary, and supplementary angles</u> <u>Angles between intersecting lines</u> <u>Triangle angles</u> <u>Angles with polygons</u> <u>Area of triangles</u> <u>Area of rectangles</u> <u>Count unit squares to find area</u> <u>Area of rectangles</u> <u>Area of parallelograms</u> <u>Area of triangles</u> <u>Perimeter</u> <u>Perimeter</u> <u>Volume of a rectangular prism</u> <u>Volume of rectangular prisms</u> <u>Volume with fractions</u>

	<u>Surface area</u>
<ul style="list-style-type: none"> – Explain volume formulas and use them to solve problems 	<u>Area of shapes on grids</u> <u>Area of trapezoids & composite figures</u> <u>Volume of cones, cylinders, and spheres</u> <u>Cross sections of 3D objects</u>
<ul style="list-style-type: none"> • Modeling with Geometry 	
<ul style="list-style-type: none"> – Apply geometric concepts in modeling situations 	<u>Surface and volume density</u>
Subarea IV: Statistics and Probability	
<ul style="list-style-type: none"> • Basic Statistics and Probability 	
<ul style="list-style-type: none"> – Develop understanding of statistical variability 	<u>Representing data</u> <u>Stem and leaf plots</u> <u>Picture graphs, bar graphs, and histograms</u> <u>Frequency tables and dot plots</u> <u>Statistics overview</u> <u>Categorical data displays</u> <u>Population variance and standard deviation</u>
<ul style="list-style-type: none"> – Summarize and describe distributions 	<u>Comparing features of distributions</u> <u>Mean and median: The basics</u> <u>More on mean and median</u>
<ul style="list-style-type: none"> – Use random sampling to draw inferences about a population 	<u>Sampling and surveys</u> <u>Samples and surveys</u>

– Investigate chance processes and develop, use, and evaluate probability models	<u>Basic theoretical probability</u> <u>Probability using sample spaces</u>
– Investigate patterns of association in bivariate data	<u>Two-way tables for categorical data</u> <u>Dot plots and frequency tables</u> <u>Scatterplots and correlation</u> <u>Introduction to scatter plots</u> <u>Interpreting scatter plots</u> <u>Estimating lines of best fit</u> <u>Two-way tables</u>
• Interpret Categorical and Quantitative Data	
– Summarize, represent, and interpret data on a single count or measurement variable	<u>Histograms</u> <u>Stem-and-leaf plots</u> <u>Line graphs</u>
– Interpret linear models	<u>Correlation and causality</u>
• Make Inferences and Justify Conclusions	
– Understand and evaluate random processes underlying statistical experiments	<u>Population variance and standard deviation</u>
• Use Probability to Make Decisions	
– Use probability to evaluate outcomes of decisions	<u>Experimental probability</u> <u>Count outcomes using tree diagram</u>
