HOW TO READ A…Delaware Science Literacy Concept Organizer

The Science Literacy Concept Organizers, were created to assist teachers in aligning their instruction to the Common Core State Standards. These Science Literacy Concept Organizers are not replacements for teachers' individual units. They are deconstructions of the Common Core State Standards. These Literacy Concept Organizers are a resource from which teachers can select appropriate *Knowledge*, *Understandings*, and *Dos* to develop their own unit(s) of instruction.

***Knowledge*:** Refers to information such as vocabulary terms, definitions, and facts that may or may not need explicit instruction, however, are the foundation on which the lesson will be built.

Understandings: Refers to the important ideas, principles, and generalizations that allow students to make connections and see patterns and relationships among content. These are the goals of the instruction, outcomes you expect to achieve.

Dos: Refers to demonstration of skills. These are the skills that require explicit instruction. By the completion of a lesson/unit, students should have mastered the selected skill(s).

GRADE 9-10 Key Ideas and Details
Reading Standard 1
For Literacy in Science and Technical Subjects

The shaded areas highlight both the College and Career Readiness Anchor Reading Standard Key Ideas and Details and the CCSS for the grade level indicated.

College and Career Ready (CCR) Anchor Reading Standard for Literacy in History/Social Studies (1): Read closely to determine what the text says explicitly and to make logical inferences from it; cite specific textual evidence when writing or speaking to support

CCSS – Grade Level Reading Standard 9 (Literacy in History/Social Studies)

Grade 6-8: Analyze the relationship between a primary and secondary source on the same topic.	**Grade 9-10:** Compare and contrast treatments of the same topic in several primary and secondary sources.	**Grade 11-12:** Integrate information from diverse sources, both primary and secondary, into a coherent understanding of an idea or event, nothing discrepancies among sources.
KNOW (Factual)	**UNDERSTAND (Conceptual)**	**DO (Procedural & Application)**
• Informational text (science expository/technical texts) • How to trace/delineate an author's argument and specific claims • Fact • Opinion • Arguments • Sound/logical/justified reasoning • Valid vs. invalid claims	• Good readers of science and engineering text(s) evaluate the reasons and evidence that authors use to support their arguments and specific claims in informational text(s).	• Identify fact • Identify opinion • Identify reasoned judgments based on scientific research • Differentiate between claims which are supported by reasons/evidence and those which are not • Differentiate between valid and invalid claims • Distinguish among facts, reasoned judgment based on research findings, and speculation in a text.

Range of Reading and Level of Text Complexity
CCSS Grade Specific Standard 10 (Grade 6-8)
By the end of grade 8, read and comprehend history/social studies texts in the grades 6-8 text complexity band independently and proficiently.
Informational Text-Literary Nonfiction and Historical, Scientific, and Technical Texts
Includes biographies and autobiographies; books about history, social studies, science, and the arts; technical texts, including directions, forms and information displayed in graphs, charts or maps; and digital sources on a range of topics

This arrow indicates the CCSS of grade level prior to the grade level you are working. This allows you to see the progression of from grade to grade.

This arrow indicates the CCSS of grade level above the grade level you are working. This allows you to see the progression of from grade to grade.

The Know, Understand and Do columns align to the shaded grade level.

These recursive strategies are the basic reading strategies that students must know and use to become successful readers. Some of the strategies are not explicitly stated in the Common Core State Standards for ELA.

Reading **Reading Recursive Strategies:**

- **Assimilating prior knowledge**
- **Rereading to clarify information**
- **Seeking meaning of unknown vocabulary**
- **Making and revising predictions**
- **Using critical and divergent thinking and assimilating prior knowledge to draw conclusions**
- **Making connections and responding to text**

These **Science Literacy Concept Organizers** are <u>not</u> replacements for teachers' individual units. They are deconstructions of the Common Core State Standards. These Literacy Concept Organizers are a resource from which teachers can select appropriate *Knowledge*, *Understandings*, and *Dos* to develop their own unit(s) of instruction.

These recursive strategies are the basic reading strategies that students must know and use to become successful readers. Some of the strategies are not explicitly stated in the Common Core State Standards for ELA

Reading Recursive Strategies:

- **Assimilating prior knowledge**
- **Rereading to clarify information**
- **Seeking meaning of unknown vocabulary**
- **Making and revising predictions**
- **Using critical and divergent thinking and assimilating prior knowledge to draw conclusions**
- **Making connections and responding to text**

GRADE 9-10-Craft and Structure
Reading Standard 5
for Literacy in SCIENCE

College and Career Ready (CCR) Anchor Reading Standard for Literacy in History/Social Studies (5): Analyze the structure of texts, including how specific sentences, paragraphs, and larger portions of the text (e.g., a section, chapter, scene, or stanza) relate to each other and the whole.		
CCSS – Grade Level Reading Standard 5 (Literacy in History/Social Studies)		
Grade 6-8: Analyze the structure an author uses to organize a text, including how the major sections contribute to the whole and to an understanding of the topic.	**Grade 9-10:** Analyze the structure of the relationships among concepts in a text, including relationships among key terms (e.g., force, friction, reaction force, energy).	**Grade 11-12:** Analyze how the text structures information or ideas into categories or hierarchies, demonstrating understanding of the information or ideas.
Know (factual)	**Understand (conceptual)**	**Do (procedural & application)**
• Informational text (science expository/technical texts) • How to analyze • Various text structures (e.g., sentences, paragraph, chapter, section) • Various patterns of organization (e.g., sequence/chronological order, classification, definition, process, description, comparison, problem/ solution, simple cause/effect, conflict/resolution) • Various text features (e.g., title, author, cover, pictures, captions, maps, chapter headings, information from charts and graphs, illustrations, glossaries, indices) • Difference between text structure and text feature • Relationships between parts of text and whole text (as indicated by text features and structures)	• Writers of scientific and engineering text(s) use organizational patterns and features to chunk and arrange the information so readers can deconstruct the text. • Good readers of science and engineering text(s) understand the structures and features of a text, and use them to make sense of what they read.	• Identify text features (e.g., title, author, cover, pictures, captions, maps, chapter headings, information from charts and graphs, illustrations, glossaries, indices) • Identify text structures (e.g., sentences, paragraph, chapter, section) • Describe the relationship between text organization and development of ideas • Analyze the relationship between text organization and development of ideas • Analyze the structure of the relationships among concepts in a text, including relationships among key terms (e.g., force, friction, reaction force, energy).
CCSS-Grade Specific Standard 10 (Grade 9-10)		

Reading Recursive Strategies:
- **Assimilating prior knowledge**
- **Rereading to clarify information**
