

Trabajo del verano para español 3 Honores

You are on your way to becoming fluent, we assume that is your goal since you have taken this step into the upper levels! This year, you will begin dreaming in Spanish and you should be understanding more and more but it takes practice! Your 50 minute class time is not enough so use your time this summer to practice!

You should also be practicing online as much as possible through any apps/online like: **Duolingo QuizUp Babbel Busuu Memrise or BBCLanguages** most of these are free so use them and get a jump.

For your required work you can find it on Conjuguemos, follow the instructions below and then I will assign you to my class so that you can do the practices until you know them...as many times as you need to get them right!

Go to Conjuguemos.com, log on , click on settings tab at top, then click the settings tab in the middle of the page, look at Step 2 “choose a teacher” Choose Me Melodie Thurston, click submit. You must complete this part of registration immediately! If you are new to this school you must create an account and you will need the school code 90111 to register. Please send me an email that you have done so, because I will have to assign you to the class in order for you to access the activities.

Listen to music in Spanish, I Heart Radio has stations that play popular latin music...put that in the search bar. Or create your own Pandora or Spotify list. There is a list of songs that are popular right now that you can listen to this summer on my website. Find the music and listen to it, pick a couple of artists that you really like and listen to more of their music.
