

LearnZillion is now Imagine Learning!

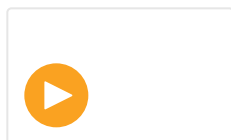

We have taken the next step on our journey to empower more educators, engage more students, and connect more families to learning, by bringing together our products under one brand, united by a shared mission. We are excited to share these updates and enhancements coming to Imagine Learning Illustrative Mathematics (IM) powered by the Imagine Learning Classroom (ILC) digital experience for Back to School 2022. Check back for more updates!

K-5 Updates

New Video resources to support teachers and parents, and engage students!

Learning Narrative Videos: These videos offer teachers a quick overview of the unit narrative that lays out the story of the unit. They provide math background information to ensure deeper coherence from unit to unit. The unit videos will be available in unit pages starting summer 2022, until then you can check out the prototype below!

2.5 Learning Narrative Video

From  Illustrative Mathematics

Prototype content

Duration 4:22 min

Family Supports Videos: These videos help parents and caregivers support student math learning outside of the classroom. They include key math concepts and vocabulary for the unit, as well as an interactive prompt and activity to engage students at home. These videos can be found in the home connection on unit pages starting summer 2022, until then you can check out the prototype below!

2.5 Family Supports Video

From  Illustrative Mathematics

Prototype content

Duration 1:03 min

Context Videos: These student-facing videos bring the math concept for the unit to life for students through a fun, relevant real-world context. Teacher guidance and support for referencing and making connections to the videos during instruction is included. These videos can be found in the section pages starting summer 2022, until then you can check out the prototype below!

2.5 Context Video

From  Illustrative Mathematics

Prototype content

Duration 3:00 min

Digital Centers

Centers give students time to practice concepts and build math fluency in partners or small groups throughout the year. To ease teacher prep and management, as well as provide Center opportunities outside of the classroom, Imagine Learning is developing digital versions of selected Center activities! These Digital Centers can be assigned to students from the Imagine Learning Classroom (ILC) platform, supporting turn-based play on a single device or play against a computer.

There first center will be available in early summer - check back for a preview soon!

Additional Practice Problem Sets

Our teachers have spoken, and we have listened. We're doubling the amount of practice problems in Imagine Learning IM. "Form B" practice sets will be available as digital and printable sets for each section giving you more options for practice in class or at home. Practice sets will release on a rolling schedule starting summer of 2022.

Instructional Routine Videos and Sample Lessons

Working with partner districts, we're capturing the magic of Imagine Learning IM instruction live in-action, in real classrooms!. These exemplar videos will feature at least one full lesson from warm-up to cool-down and an example of instructional routines. Videos will be released summer of 2022.

Other Updates

Spanish Digital Assessments

Spanish Digital assessments are being added now, and we'll be coming back to place voice over in the K-2 assessments before the fall.

2.5 Evaluación final de la unidad

From  Illustrative Mathematics

This is the digital version of the end-of-unit assessment for Grade 2, Unit 5. Paper-based versions of this assessment are available in the Additional Materials tab. This assessment is intended to gauge students' understanding of the key concepts of th...

Addressed standards 2.NBT.A.1, 2.NBT.A.1.a, 2.NBT.A.2, 2.NBT.A.3, 2.NBT.A.4

Pre-Unit Practice Problems

The pre-unit practice problems are being split out into a separate set of problems along with recommended centers or activities to provide some additional support to students.

Content Fixes

Coming out of version 1.0, we've updated the materials lists and print materials for any corrections. These were minor changes, 2021 student workbooks can be used and mixed with 2022 materials.

Imagine Learning Classroom Updates

Imagine Learning's engineering and design teams are working on some big updates for the platform this year. Along with a new name, there will be a new design with improved navigation and enhancements to live learn, data dashboard, grading, and more! More information will be available soon!
