**Subject:** ERA/HB399 - Revised

Dear Governor Carney and Secretary Bunting,

I appreciate you voting no on the ERA. The three amendments that Republicans presented very well thought out and I agreed with them 100%. We cannot have such a vague ERA which just leaves the future open to manipulation by the judges. Thanks again for your vote and keep up the good work. I may not be in your district but I appreciate your work for Delaware. Rest assured I will be sending another email to my senator asking him to not vote yes again

**To:** DOEregulations comment  
**Subject:** Thank you for voting NO on HB399!!

Dear Governor Carney and Secretary Bunting,

THANK YOU for your very courageous vote to oppose the ERA. THANK YOU for hearing my concerns as well as those of MANY other constituents in Delaware. I truly appreciate that three Republicans offered three well thought-out, clear amendments that called out the Democrat's complete lack of clarity on every critical concern raised. The Democrat's approach is 'the end justifies the means'. To that end, they aggressively introduce bills that seem innocuous at first, precisely because critical words are poorly defined, and then quickly use these inroads to force more progressive ideologies on Delawareans. While I may not be in your particular district, I take the responsibility of being a well-informed voter quite seriously. This is my state. This is my home. What happens in Delaware's legislatures matters to me. Your single vote was critically important in protecting my voice in this process. Stand firm on principle. Do not fear verbal abuse by your opponents. Voters see through the empty rhetoric. Speak truth with conviction. DEMAND truth on all issues before you vote.

**Subject:** Regulation 608

Can the following definition be clarified as to the time of year the data would be pulled and also how it would be pulled? For example would it be from eschool mid-year, and are all students counted even if on Z Calendar, or is the enrollment pulled on 9/30 of the given year when rolls are clean. Would help districts if this was clarified when doing our own calculations.

Enrolled Students" unless the context indicates otherwise, means all students included in the Delaware Student Information System (DELSIS) report for the year of the data collection.

Can it also be added that when the DOE does the calculations yearly that districts will be notified should a school should fall into the category of Persistently Dangerous starting the first year?

Thank you for your consideration

**Subject:** Regulation 225

Good morning,

In reference to student gender and accommodations I would like to bring it to the schools attention that rather than segregating or creating divisions by providing separate facilities for the sole use of those who are transgender I would propose doing away with bathrooms having more than 1 stall.

In student bathrooms there isnt any supervision and it is a place where many conflicts happen regularly for all students.

If separate bathrooms or locker rooms are created I would think this would create a division and a way to bully the students who chose to use them.

Perhaps doing away with multi-stall bathrooms would be a way to maintain the safety and privacy of ALL students.

Thank you,

Erin Chronister

My daughter came to MHS in tenth grade from a Friend's school education in Philadephia. She expressed to me she has never experienced racism like she has in MHS. I have to say that hurt me to my heart. We moved here because of the school district and what we thought would be a diverse educational experience. At this point she can't wait to graduate to get away from MHS!
