

BUSINESS MANAGEMENT
AND ADMINISTRATIONINTERNATIONAL
BUSINESS
PATHWAY

The International Business pathway provides students with a foundation of core concepts required to succeed in an international business environment. Students will learn essentials for working in an international business environment, managing a business, and owning a business. Key concepts emphasized include global awareness, spirit of entrepreneurship, and cultural competency. Students will also study real, specific, historical cases from international businesses over the years and analyze how those businesses have handled certain situations in foreign markets. Consequently, the use of case studies will allow students to use the knowledge gained to analyze and evaluate decisions made by real international businesses. At the end of this pathway, students will have developed the project management and business management skills that are the basis for developing and managing a business in an international market.
