

Algebra • Classify and Count by Color

blue

green

yellow

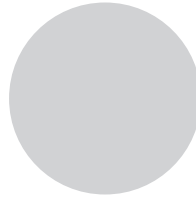

red

DIRECTIONS 1. Place a green triangle, red triangle, blue circle, yellow square, blue rectangle, red rectangle, and green triangle at the top of the page as shown. Sort and classify the shapes by the category of color. Trace and color a shape in each category. Draw and color the rest of the shapes.

Name _____

Algebra • Classify and Count by Shape

rectangle

triangle

circle

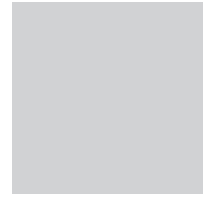

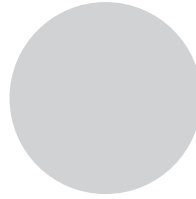

square

DIRECTIONS Place a green triangle, red triangle, blue circle, yellow square, blue rectangle, red rectangle, and green triangle at the top of the page as shown. Sort and classify the shapes by the category of shape. Trace and color a shape in each category. Drawn and color the rest of the shapes.

Name _____

Algebra • Classify and Count by Size

big

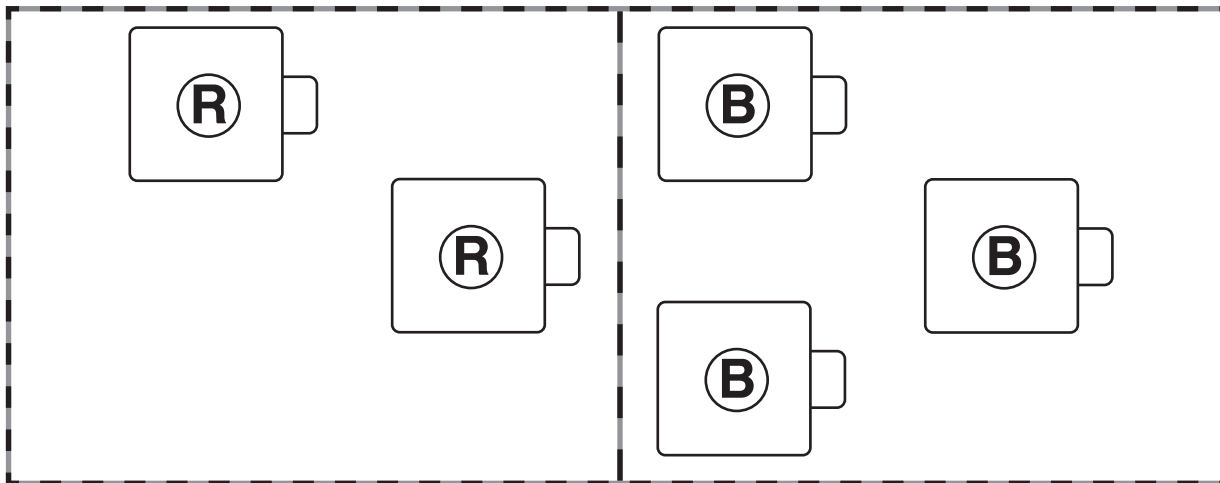

small

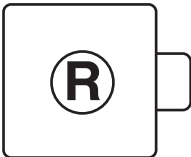

DIRECTIONS Place a green triangle, red triangle, blue circle, yellow square, blue rectangle, red rectangle, and green triangle at the top of the page as shown. Sort and classify the shapes by the category of size. Trace and color a shape in each category. Draw and color the rest of the shapes.

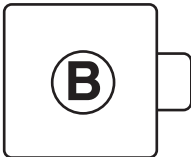

Make a Concrete Graph

Red and Blue Cubes				

 - - - - -

 - - - - -

DIRECTIONS 1. Place cubes in the workspace as shown. R is for red, and B is for blue. See how the cubes are sorted and classified by the category of color. 2. Move the cubes to the graph. Trace and color the cubes. 3. Write how many of each cube.

Read a Graph

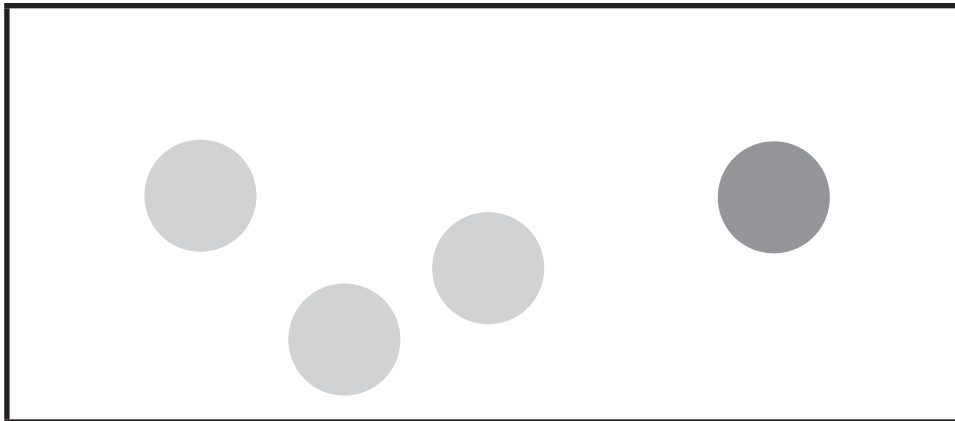

DIRECTIONS 1. Color the counters to show the categories. R is for red, and Y is for yellow. How many counters are in each category? Draw a dot on each counter on the graph as you count. Trace or write the numbers. 2. Trace the circle around the category that has fewer counters on the graph.

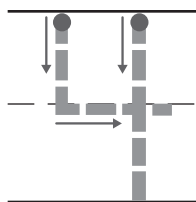

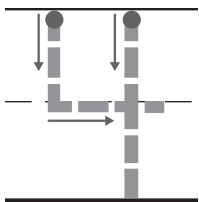

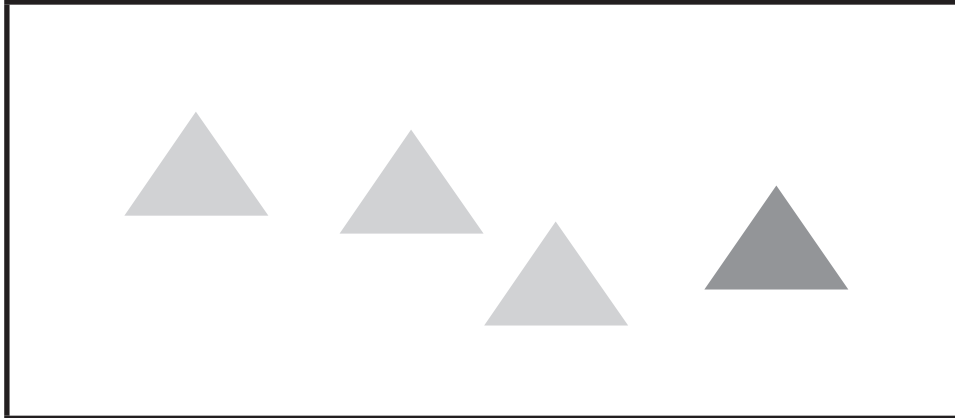

Problem Solving • Sort and Count

circle

triangle

all

DIRECTIONS 1. Look at the sorting mat. How are the shapes sorted? How many circles are there? How many triangles are there? Draw a dot on each shape as you count. Add the two sets. Trace and write the numbers and symbols to complete the addition sentence.
