

Landform Project

You have been assigned the following Landform _____

Complete the following questions as they relate to your landform.

1. Write down the sources you used to find your information in the box below.

2. Describe the landform. (Include information such as the size, height, color, what it's made of etc.)

3. Where can the landform be found?

4. How was the landform created?

5. List reasons people may want to visit the landform. (Think about what makes it special)

6. List items people might want to bring with them if they visited the landform. Tell how each item could be helpful.

7. List a minimum of 5 fun facts about the landform. (For example, the number of people who visit it each year.)

***** While writing your research report, please be sure to indent where needed. Sentences must be complete, capitalized, and punctuated corrected. Do not copy the sentences. Write your OWN!**

Make a museum artifact of your landform. For example, you could build model, diorama, booklet, design a PowerPoint, a poster, or a brochure to name a few, however, it must include all of the required information.

Use books, magazines, and websites to help you find out all you can about the landform you have chosen. You may find a list of helpful links attached. (Provides information about your landform)

You will give a brief oral presentation to share some of the information you learn. Do not read your report to the class. Just tell us about something interested you learned.

You may write or type your report. Yes, families are encouraged to help. Working together is fun!!

Name: _____

Parent Signature: _____

Report Due Date: August 30, 2013
