

Living History Museum 2017

Ms. Cruce's Gifted Class K-5 presented a Living History Museum program. Each student researched a famous inventor, wrote and memorized a 2 minute speech. They also made a costume and model of the invention the inventor is noted for. Parents, staff and other classes were invited to visit the museum. Each inventor (student) had a sticker on their hand. When someone pushed the button the inventor came to life and shared their speech like a wax museum. Everyone enjoyed an amazing interactive trip to the museum and learned interesting facts of some popular inventions.
