Solve simple cases by inspection. <i>For example, $3x + 2y = 5$ and $3x + 2y = 6$ have no solution because $3x + 2y$ cannot simultaneously be 5 and 6.</i></p> <p>MAFS.8.EE.3.8c Solve real-world and mathematical problems leading to two linear equations in two variables. <i>For example, given coordinates for two pairs of points, determine whether the line through the first pair of points intersects the line through the second pair.</i></p>	
Assessment Limits	<p>Numbers in items must be rational numbers.</p> <p>Coefficients of equations in standard form must be integers.</p> <p>Items written for <i>MAFS.8.EE.3.8a</i> will include the graph.</p> <p>Equations used in items must be provided.</p>
