

Manage Temporary Personnel Assignments

Introduction

Tracking of Temporary Personnel Assignments (TAs) within eHR will allow for accurate accounting of staff assignments that can impact recruiting, compensation, evaluations, and access roles\security. Currently, short-term TA assignments are only tracked by having a Form 10 submitted for payroll purposes after-the-fact. A Form 5 is used for long-term TA assignments (90 days or more) which are tracked in eHR because the position's prior incumbent is placed on leave (with or without pay).

Tracking of TAs in the personnel system will allow for automation and documentation of the approval process and provide information to other DOE and non-DOE systems that require notification for security access management.

This functionality will allow District Personnel Regional Officers (PRO) or Complex Area Superintendents (CAS) to initiate and approve the temporary assignment of an individual into a school Principal position. While not directly impacting Annual Cycle processes, this TA process will also cover Vice-Principals and Athletic Directors (all school based Educational Officers <EOs>).
