

# Microsoft Tools for Teachers

Microsoft has many free tools that are available to educators. Check out the Partners in Learning Resources website for a list of many of them. As you peruse the list, think about your instruction and what tools could enhance the engagement of your learners in the classroom.

## Where to Find These Resources

### [Learning Suite](#)

Get many of Microsoft's most innovative applications, web-based tools, and teacher resources in one simple, customizable download. Then access and update them from one easy-to-use interface.

### [Partners in Learning Resources](#)

Want to see how other educators are using free tools in their classroom? Join the Partners in Learning Network and browse a list of Microsoft tools for the classroom. Download learning activities or watch tutorials that feature your tool of choice.
