Overview/How to Use the Tests

INTRODUCTION

Cold Reads for Fluency and Comprehension is designed to provide differentiated reading comprehension practice using selections that students have not seen previously. Cold Reads for Fluency and Comprehension is intended to prepare students to take the Reading/Language Arts section of standardized tests, state-wide tests, and teacher-made tests. The program includes comprehension practice taught in myView Literacy. This Teacher's Manual includes the following: (1) notes on how to use the Cold Read tests, (2) instructions on how to administer and score a fluency test, (3) a chart on which you may record the progress of your students, (4) item analysis charts that provide teachers the opportunity to track students' strengths and areas of need, and (5) annotated copies of all the Cold Read tests indicating the answers to all questions.

HOW TO USE THE COLD READ TESTS

The purpose of the Cold Read test is to give weekly opportunities for students to practice the comprehension focus and high-frequency words covered in *myView Literacy*.

This book contains three Cold Read tests for each week. They are intended to be used independently from the reading workshop text selection in *myView Literacy*. Each test includes a "Cold Read" leveled selection and related comprehension items that assess the weekly comprehension focus, associated Common Core State Standards and previously learned skills. Across each unit's Cold Read selections, high-frequency words are strategically placed within the text to give students an additional opportunity to practice reading these words in context for meaning and fluency.

Selections and items on the Cold Read tests are written to assess varying levels of proficiency—Developing (D), On-Level (OL), and Advanced (A). The code at the bottom of each page tells you the level of each test.

Cold Read tests can be administered independently, or you may choose to work through them with students in small groups in order to provide support and assess students' progress. Before beginning each test, make sure students understand the test directions and are aware of how to correctly indicate answers. Explain that multiple-choice answers should be filled in, and short-response items should be answered in one to three complete sentences.

Other ways to use the Cold Read pages:

- Use the Developing pages to give the whole class an opportunity to practice the weekly comprehension focus and/or test-taking skills.
- Use the Developing pages after introducing weekly comprehension focus but prior to reading the Reading Workshop text in the myView Literacy student interactive to assess students' readiness to read that text.
- Use the On-Level pages as an assessment tool to check students' understanding of the weekly comprehension focus and/or test-taking skills.
- Use the On-Level pages to determine if students need further practice, reteaching, or more challenging materials.
- Use the Advanced pages for students working above grade level.
- Use any of the pages as preparation for the Unit Test.

A NOTE ABOUT GRADE 1

Grade 1 is a transitional grade for reading. In this grade, students will move from comprehension of image-based "stories" into text-based reading. The Grade 1 Cold Read tests are unique in several ways.

In Unit 1, all test questions are intended to be read aloud to the children for all three levels of the tests. In Unit 2, the test questions are to be read aloud to the children only for the D and OL tests. You may choose whether or not to read these and other tests aloud, based on your knowledge of your class. In addition:

- Selections show running numbers beginning in Unit 3.
- For Developing students, text-based selections do not begin until Unit 3. Two exceptions fall in Unit 2, weeks 3 (poetry) and 4 (drama).
- For On-Level students, text-based selections do not begin until Unit 2. One Unit 2, Week 4 item tests rhythm and should be read aloud.
- For Advanced students, text-based selections begin in Unit 1.

Administering and Scoring a Fluency Test

ADMINISTERING A FLUENCY TEST

A fluency test measures a student's reading rate, or the number of words correctly read per minute (wcpm), on grade-level text the student has not seen before. Although the speed at which a student reads is part of determining fluency, it is not the only measure. When students read fluently, they read aloud as they would speak conversationally. Appropriate expression, prosody, reading rate, and comprehension are all part of reading fluently.

Prior to administering a fluency test, review fluency test procedures with the student. Explain that the purpose of the fluency test is to understand more about how the student reads.

Administer the fluency test individually so you can record student data. Give the student a copy of the Student Copy of the selection for the test and make a copy of the Teacher Copy for yourself. The Teacher Copy has a scale of running numbers to make it easier for you to know how many words the student reads during the fluency check, while the Student Copy does not have running numbers. Write the student's name and the test date at the top of your copy of the selection. This will help you compare data on future tests. Have a watch or clock available for timing the reading.

Have the student read the text aloud. Do not have the student read the title as part of the fluency reading; it is not included in the running word count. You may want to record audio of the student's reading for later evaluation. Stop the student at exactly one minute and note precisely where he or she stopped.

As the student reads orally, mark any miscues or errors he or she makes during the reading (see the chart on page T13). Count the total number of words the student reads in a minute. Subtract any words he or she reads incorrectly. Record the words correct per minute score on the test.

The formula is: total # of words read – # of errors = words correct per minute (wcpm).

HOW TO IDENTIFY MISCUES AND ERRORS

Based upon the selection on page T14, the chart below shows the kinds of miscues and errors to look for as a student reads aloud, and the notations to use to mark the miscues and errors.

READING MISCUE	NOTATIONS
Omission The student omits words or word parts.	It is@sunny day
Substitution The student substitutes words or parts of words for the words in the text.	"Try to $\frac{put}{get}$ the ball in the hoop.
Insertion The student inserts words or parts of words that are not in the text.	Ava puts the hoops on the grass.
Mispronunciation/ Misreading The student pronounces or reads a word incorrectly.	be∥ "Let's throw the ball ," Ava says.
Hesitation The student hesitates over a word and the teacher provides the word.	"That's boring," Rob says.
Self-correction The student reads a word incorrectly but then corrects the error.	Ava sees some hoops.

Notes

- If the student hesitates over a word, wait several seconds before telling him or her what the word is.
- If a student makes the same error more than once, count it as only one error.
- Self-correction is not counted as an actual error. However, writing "SC" over the word or words will help you identify words that give the student some difficulty.

Cold Reads T13

Here is the selection marked as shown on the chart on the previous page. As the student reads the selection aloud to you, mark miscues and errors. Have the student read for exactly one minute, and then mark the last word he or she reads.

Interpreting the Results

According to published norms for oral reading fluency, students at the end of Grade 1 should be reading fluently at 60 words correct per minute in text that is on grade level. This chart provides recommended milestones to work toward that goal. For example, if a first-grade student reads 59 words correct per minute in winter, he or she is at the 75th percentile. If the same student reads 116 words correct per minute in the spring, he or she is now at the 90th percentile.

GRADE	%ILE	FALL WCPM	WINTER WCPM	SPRING WCPM
	90		97	116
	75		59	91
1	50		29	60
	25		16	34
	10		9	18

If a student's reading rate is lower than the suggested rate for his or her grade level, your notes on the student's miscues may help you determine why the rate is low. Does the student make errors that indicate his or her decoding skills are poor? If so, further instruction in phonics may be needed. Do the errors reflect a lack of comprehension or limited vocabulary? If so, instruction in comprehension strategies and exposure to more vocabulary words may help. A lack of fluency may indicate a lack of exposure to models of fluent oral reading. It may also mean the student is not reading enough material at his or her reading level. Encourage the student to read more books or children's magazine articles at an accessible or comfortable level of reading for him or her.

FLUENCY AND "QUALITATIVE" MEASURES

There are many considerations to keep in mind when measuring a student's oral reading fluency. First, it is important to note that oral reading fluency measures a student's oral reading accuracy and speed, including words, phrases, and sentences for a short period, typically one or more minutes. Because text changes influence students' familiarity with the words and content of what they are asked to read, oral reading fluency is highly variable and can change throughout the course of a relatively brief period of time, such as several weeks, and certainly is expected to increase over longer periods of time such as a semester or year. There are several factors that influence students' oral reading fluency, including: (a) some students are anxious reading aloud and do not read as well as they would silently; (b) occasionally unfamiliar words influence student's success in reading accurately; and (c) the topic of the text might be familiar and increase oral reading fluency, or highly unfamiliar and decrease oral reading fluency. Even though there are conditions that affect fluency, over time with effective reading instruction, students' oral reading fluency should increase in accuracy and proficiency (number of words read correctly in a designated amount of time—typically one minute).

Fluency is not aimed at determining how fast a student reads. Students should be able to read and comprehend the text they are provided—the ultimate goal of reading—and not just read to complete a task. Speed should follow as a result of stronger fluency rather than lead fluency.

As a student's skill and ability to read fluently grows, so does a student's capacity to demonstrate fluency. Automaticity of word reading is one sign that fluency is developing. Fluency activities provide a means for students to improve their reading of words, phrases and sentences, on their way to improving vocabulary knowledge and text comprehension. Oral expression, another index of fluency, develops and evolves as fluency grows. Students will begin to speak text expressively, engaging in meaningful expression of words and dialogue. Fluency becomes a measure of prosody as well as syntax.

When measuring student fluency, look for signs of expressive language, including a student's ability to use words in context and emphasize key words in sentences. Look for signs of speed and accuracy in reading as well. Remember that as students read faster, they are more likely to engage in self-correction, which is an important and meaningful fluency and comprehension skill.

Fluency is also a gradual process that is bound to differ from student to student. Some students exhibit fluency right from the beginning of their reading career. For others it develops more slowly. In general, students in Grade 1 and the first half of Grade 2 focus on pronouncing words and phrases. During the second half of Grade 2, students may begin showing signs of building prosody and the use of expressive language in their reading. These are all key variables to denote when measuring and recording the fluency of students during a fluency test. As students move into older grade levels, beginning with the end of Grade 3, and moving into Grades 4 and 5, they are likely to demonstrate greater fluctuation in their oral reading fluency scores. However, over time, if their words correct per minute are charted, students would demonstrate improvement in number of words read correctly in the designated time frame.

Fluency Rubric

Score	VOLUME AND EXPRESSION	SYNTAX/PROSODY	ACCURACY	RATE
4	The student reads at an appropriate volume and with expression.	The student demonstrates correct phrasing and adjusts for punctuation. Stress and intonation are appropriate.	The student reads accurately. A rare, minor error may occur or be self-corrected, but does not appear to affect comprehension.	The student reads at a natural-sounding, conversational pace.
3	The student mostly reads at an appropriate volume and with expression but occasionally lapses into a quieter voice or lacks expression.	The student generally uses correct phrasing but occasionally sounds choppy or does not adjust for punctuation. Stress and intonation are adequate.	The student mostly reads accurately. Errors sometimes result from a difficult word or sentence structure. Errors may be self-corrected and do not appear to affect comprehension.	The student reads at an uneven pace, too slow or too fast at times.
2	The student reads somewhat quietly. Expressiveness is minimal.	The student reads in short phrases and does not adjust for punctuation. Stress and intonation are lacking or inappropriate at times.	The student makes a number of errors while pausing/hesitating frequently. Errors may affect comprehension.	The student reads somewhat slowly.
1	The student is difficult to hear. There is little or no expressive reading.	The student reads in a choppy, word-by-word manner. Stress and intonation are absent or inappropriate.	The student makes many errors to the point of affecting comprehension.	The student reads slowly and with difficulty.

Morris Frank

In 1927, Morris Frank heard a story about dogs in a different country. The story said that the dogs helped people who could not see.

Morris also could not see. He had lost his sight when he was 16. He sent a letter to the woman who wrote the story about the dogs. He said he wanted to train dogs in the United States to help people, too. The writer helped Morris get to the training school in the other country.

At the school, Morris learned to work with a dog named Buddy. He learned how to carry Buddy's leash. Morris learned ways to use words to tell Buddy what he needed. Soon, Buddy and Morris came home. Then Morris started a school to train dogs in the United States to help people. Today we know Morris as the person who brought "seeing-eye dogs" to the United States.

Evergreen Trees

Have you seen an evergreen tree before? You may have seen one, because they grow in many areas. Evergreen trees have needles, not leaves. Unlike trees that lose their leaves, evergreens do not lose their needles. Evergreen trees can get as tall as 100 feet before they are done growing! On the branches of these trees are pine cones. The pine cone holds the evergreen's seeds. Like other trees, evergreens need sunlight and water to grow. The sap from these trees is very sticky! Evergreens are green all year, even in the winter.

- I What information from the selection does the graphic help you understand?
 - O How tall an evergreen tree is
 - O How an evergreen tree grows
 - O The parts of an evergreen tree

Keep Parks Healthy

People are talking about making changes to the town park. Some people want to build a food stand. Other people want to put in walking trails. I think the walking trails are a better idea. Why? Most food stands do not have healthy food. They often sell candy and chips. Eating this food is not good for you. On the other hand, walking is a good way to stay in shape. You can be in the open and enjoy the fresh air. You can look at beautiful trees and plants. You can play hide-and-seek and laugh with your friends. You can climb and jump off large rocks. Putting in walking trails is a better idea than building a food stand.

- I The author wants the reader to think
 - O walking trails are a waste of money
 - O food stands are important for the town park
 - O walking trails are healthier than food stands
- 2 What is the author trying to persuade readers to support?
 - O Town parks
