NFL flag football rules with the following modifications:

- All games will be 20 minute halves (running clock) with a five minute halftime.
- Teams will have three downs to cross midfield, then three downs to score.
- If a team fails to cross midfield or score a touchdown, the opponent will take possession on their own five yard line.
- No overtime.
- Games can end in a tie.
- All players who rush the quarterback must be 10 yards from the line of scrimmage when the ball is snapped.

**S.E. KALAMA INTERMEDIATE SCHOOL**

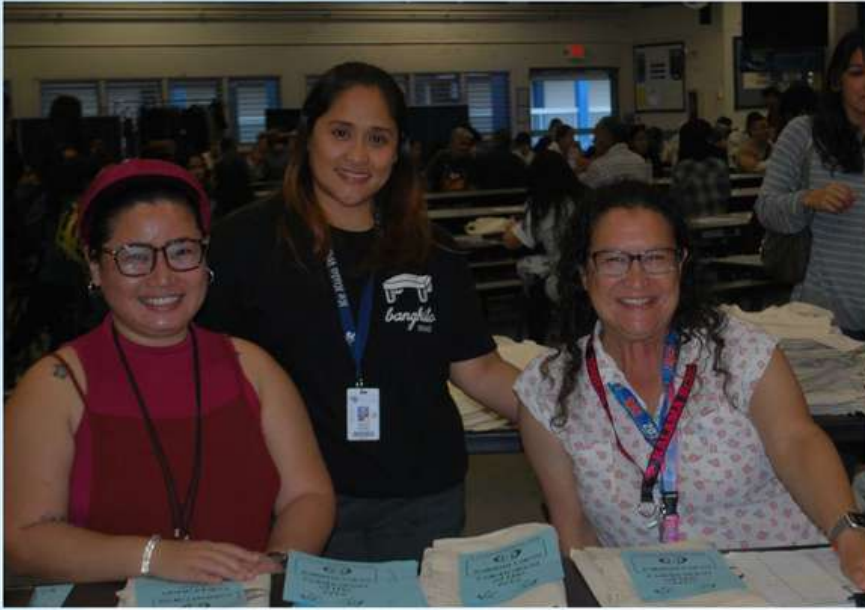

Kalama Cares is a school sponsored event which strengthens and builds upon the foundation of our school community.

Arts Displays by Ms. Lutz's Class, Ms. Sanvidotto's Class,

**Kalama Cares**

Mr. Benny Uyetake and the Kalama School Ukulele Program.

# KALAMA PANTHER CHEERLEADERS!

Kalama Cares

KALAMA  
DRAMA  
CLUB

Mahalo to everyone who contributed to make the Kalama Cares event truly memorable.

Thank you parents, grandparents and families for supporting your student during this event.

To the teachers who showcased their student's artwork (Ms. Lutz, Ms. Resurrection, and Ms. Sanvidotto) and media (Mr. Houck and Mr. Guaglione) displays, your dedication to nurturing talent is truly appreciated. And to the Kalama Afterschool, Stemworks Program, Ka Pa Hula o Kalama, Kalama Panthers Cheerleaders, and the Kalama Drama Club, your performances brought joy and excitement to all who attended.

A special thanks to Pukalani Superette and Pukalani Foodland for the delicious bentos and treats that added to the evenings enjoyment.

NATURE ACTIVITIES FOR LEARNING AND UNDERSTANDING

## Mission

The mission of NALU Studies is to transform the lives of vulnerable, at-risk, and high-risk youth, empowering future generations to make responsible, healthy decisions. Our integrated, holistic, experiential-education program develops the next generation of educated environmental stewards and responsible community leaders.

## Vision

The lives of vulnerable, at-risk, and high-risk youth are transformed through experiential-education activities that connect them to the environment. As a result, they understand the value of education, culture, and leadership. They make responsible decisions for themselves, their community, and their environment. They are empowered to take action to achieve greater life success.

## Experiential Education and Environmental Stewardship Program

NALU Studies adopted the Naupaka plant, which adapts and thrives in both the mountain and coastal marine ecosystems in Hawaii. Naupaka is a perfect representation of NALU's goals to nurture people to survive anywhere and learn to care for their communities and environment. NALU Studies students, mentors, scientists and their communities malama (need kaha) in first 3rd of malama. Hawai'i's unique environment. This program works with vulnerable, at-risk, and high-risk youth to develop a commitment towards education and responsible environmental stewardship for many generations to come.

NALU Studies is a non-profit 501(c)(3) committed to redirecting the lives of our high-risk teens. Fiscally sponsored by the Pacific American Foundation.

NALU Studies does not discriminate on the basis of race, color, national origin, sex, disability, or age in its programs and activities.

### The Land Meets The Sea NALU Studies 101 ridge to reef course

Find out how much fun science and biology are through this amazing two-week program. Be the scientist and conduct water quality testing in fresh water and marine environments. Go to the U.S. Fish and Wildlife Services reserve and snorkel Hanauma Bay to identify and classify marine organisms. Explore the valleys and streams on Oahu to study native and invasive plant and animal species. Depart on a plankton tow mission to look for new marine species and use biotechnology to extract DNA from marine bacteria and more.

### Exploring Our Oceans NALU Studies 102 pre-requisite NALU 101 marine science course

An in-depth, two-week course exploring areas of oceanography including plankton, ocean currents, and navigation using the stars. Snorkel coral reefs as a marine biologist and study reef ecology and the living organisms that inhabit them at Coconut Island and other locations. Become a molecular biologist and extract real DNA from marine bacteria to assess coral reef health. Explore the lives of whales, dolphins, and sharks and their roles in the environment and Hawaiian culture.

## our island our classroom

Discover "Mālama 'Aina"  
It is our responsibility to take care of the land.  
Understand how Hawaiians used  
the Ahupua'a Management System to  
sustain our resources for our future.

### Talk Story Hawaiian Cultural Leadership

Our indigenous cultural practitioners will share Hawaiian history, culture, beliefs, and the traditions of Hawaiian leadership through the eyes of our kupuna (elders).

### Team Building Nature Activities

Enjoy outdoor activities and build lasting friendships while discovering some of Oahu's most beautiful and secluded locations.

## Community Service Projects

Making a difference one step at a time.

## the future of our students NALU graduates receive

- High School Credit
- (1) College Credit
- Pre-enrollment in the University of Hawaii
- Career Guidance
- Cultural Awareness
- Understanding of Environmental issues
- First Aid and CPR training
- Leadership skills training
- Writing skills development
- Public Speaking skills development
- Valuable and lasting friendships
- Understanding of how science and culture are connected
