

Recommended Summer Assignment for AP/IB Chemistry – Nikles

There are three units from honors chemistry I would like you to review over the summer if possible – this is especially important if you have never taken a previous chemistry course. Please email me at jenna_nikles@scps.k12.fl.us and I will send you the review information. The review will be due at the end of the first week back to school for all students, so I recommend you get started over the summer.
