

Omega Builds Your Custom Program in a Four Step Process:

1 Assessment

The Woodcock Johnson IV academic assessment evaluates your student in key areas within reading and math. The results pinpoint skill gaps and academic strengths that shape your customized program. Your student will also receive Omega's learning style assessment, MyStudyStyle™, to determine your student's primary learning style (auditory, visual, tactile) and jump start your program.

2 Custom Program

A customized program is developed for your student based on their assessment results, school grades, study habits, and family goals. Your "program emphasis" defines targeted academic areas needing most improvement and creates the most efficient instructional path to success!

3 A+IM Tutoring System®

Omega's AIM Tutoring System® provides the framework for your student's program. Your student will build vital critical thinking skills needed for the application of academic concepts. Key program objectives are integrated throughout your program. Tutors effectively manage your student's progress and send daily progress updates to parents and school teachers.

4 Omega Results

Upon program completion a post assessment and parent conference are scheduled to review your student's academic growth, quantitatively validating your program investment.

Programs Offered

- MATH (All Levels)
- READING REMEDIATION

Providing Opportunity

Omega's mission is to provide customized instruction that achieves each family's educational goals. Omega Learning® Center provides SACS accredited tutoring and test prep programs with certified teachers for every grade and subject in school.

Building Confidence

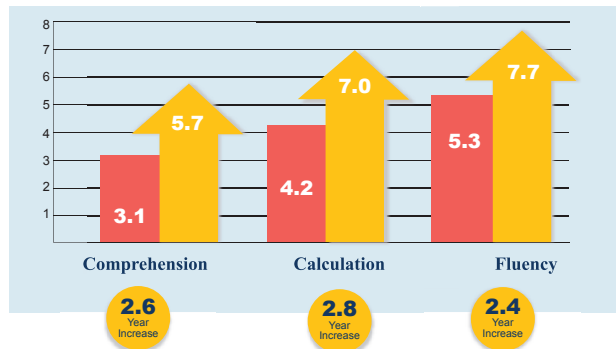

The basic skills of math and reading are like building blocks. If not firmly in place, they cannot serve as the foundation to support more advanced skills. Most skill gaps go undetected until a student struggles with more advanced concepts. Omega tutors work individually with each child to build their confidence and create a strong foundation.

Achieving Success

Academic Growth Statistics

"Our average academic growth soars 2.6 years after completing our 95 hour program!"

↑ Post-test
■ Pre-test

*Yearly Statistics are based on calculating the average grade equivalent academic growth.

**Omega guarantees a one year academic year increase in your program emphasis (Comprehension or Calculation) after completing you recommended program or you will receive fifteen hours of free tutoring!

A+IM Tutoring System®

Omega's exclusive tutoring system offers a comprehensive solution to help you achieve your short and long term academic goals. With a decade of validated results, Omega Learning® Center is your full service educational resource!

Apply

Students participate in targeted enrichment activities that build important critical thinking skills, needed to apply the basics of math and reading to more advanced learning concepts.

Integrate

Five key objectives are integrated throughout your student's customized tutoring program.

Manage

Omega's exclusive software system provides its tutors with a highly effective platform. Tutors share daily progress updates with all members of your student's "Academic Team," including parents and school teachers.

Multi-Sensory Instruction

Omega tutors use a combination of auditory, visual, and tactile teaching resources to accommodate all learning styles. Omega's individualized instruction is based on clearly defined program objectives, which include solidifying core academic concepts, improving classroom performance, and building important application skills. Omega's proprietary tutoring system provides our tutors with the teaching resources, flexibility, and insight to create your student's intuitive instructional path.

Motivational Instruction

Omega students like to go to tutoring! Omega students regard their tutor as a trusted advisor and motivational leader.

funFUN funFUN

Tutors award "Enrichment Tokens" during each session for correct answers, good effort, and a positive attitude. Younger students may redeem their tokens at our Omega Store for toys and prizes. Older students typically accumulate their tokens for gift card redemption.
