<u>Cambridge IGCSE® (preAICE) Chemistry – Summer Assignment</u> <u>Mrs. Rodriguez & Mrs. Bromley</u>

By the end of the first week of school, *Friday, August 17th, 2018*, each Cambridge preAICE Chemistry student SHOULD have accomplished the following:

Memorize a subset of element names and chemical symbols from the Periodic Table of Elements

Students will visit <u>www.quizlet.com</u> and type "*Mrs. Bromley Element Symbols*" into the search bar, or simply click on this link <u>https://quizlet.com/ eynlf</u> This set of online flashcards contains the element names and symbols for the first 36 elements and 6 (six) other common metals (Barium, Silver, Gold, Tin, Mercury & Lead). Student mastery of these elements names and their corresponding chemical symbols is essential to their success in **preAICE Chemistry (and beyond)**. The list of elements to memorize **has also been attached**, if one cannot gain access to this list online.

A few important things to note...

- Quizlet can be downloaded as an "app" on iPhones and other smartphones
- In addition to the 'flashcard feature', *Quizlet* utilizes a number of games that can be played to learn the Element names and their corresponding chemical symbols.
- Pay particular attention to the **spelling** of each element; some of them are very similar.
- Pay particular attention to the capitalization of each chemical symbol: *CO* is *not* the same as *Co*.
- Many element chemical symbols come from the Latin name for the element. For example, the chemical symbol for Gold is Au; this comes from the Latin for Gold, which is *aurum*. Learning the Latin names/roots for the element symbols that are not directly connected to their Element names on the periodic table would be most helpful.
- Students can expect their first "Element Symbols" test on Friday, August 17th, 2018
- We welcome your questions at jbromley@pasco.k12.fl.us or jegarcia@pasco.k12.fl.us
