
Preparing for Middle School

One of the most exciting aspects of entering middle school is the number of new experiences that are available for students and families to consider. River Ridge Middle School is proud to offer its students some unique elective courses, as well as advanced coursework in mathematics and science. The challenge? Picking from so many great options!

Partnering with eSchool...

This spring, students entering River Ridge Middle School will have the opportunity to use online courses to take advantage of special programs and electives for the 2020-21 school year.

Incoming 6th Grade Students:

Take M/J Mathematics Grade 6 Advanced online to begin an advanced course of study to pursue M/J Mathematics Grade 7 Advanced next year.

This option will allow students to potentially complete high school mathematics courses before leaving middle school.

Take M/J Health 4 online to meet a district requirement, and free up an elective space in your course schedule during the school year.

7th Grade Students:

Select M/J Comprehensive Science - Grade 8 online to be ready for Physical Science Honors in the fall.

Ready to chart a course for high school and beyond?

Selecting a course of study that includes Algebra 1 and/or Geometry during your middle school year helps! When students take advanced math coursework, opportunities to engage in science, technology, pre-engineering, and other related fields open up.

Students interested in advanced math placement can complete **M/J Mathematics - Gr. 6 Advanced** online this spring and summer, qualifying for placement in 7th-Grade Advanced Math for August 2020.

Students should plan to spend, on average, 1-2 hours per day to complete the online Grade 6 math course.
