<p>Highly Effective (System-wide Impact) In addition to “Effective”</p>	<p>Effective (Local Impact)</p>	<p>Needs Improvement/Developing (Leadership Potential)</p>	<p>Unsatisfactory</p>
<p>Highly effective leaders have an impact on an entire organization and are a primary source of developing additional leadership in their organization. Their performance is beyond effective. They routinely share their ideas, mentor others and view their roles as improving a single entity but also acting as an agent of system-wide improvement.</p>	<p>Effective leaders impact organizational needs within their school by reinforcing and challenging students, teachers and leaders within. They meet requirements for success. Their performance is both adequate and necessary for improvement and clearly makes a contribution to their school. While their work is challenging, rigorous, and demanding, they can be proud of their achievements.</p>	<p>Needs Improvement leaders are principals and assistant principals designated as demonstrating potential but lacking sufficient proficiencies to improve student learning, instructional practice, and/or other responsibilities. They understand what is required for success and are willing to work toward that goal with coaching and support for improved performance. They have a desire and personal motivation to make decisions necessary to become more effective leaders within a reasonable time.</p> <p>Developing is the designation reserved solely for candidates in the Leadership Development Program who have garnered an “assistant principal intern” placement at a school. Adjustments are made by evaluators as appropriate on the school leader evaluation rubric regarding expectations of assistant principal interns vs. bona fide assistant principals or principals. For the assistant principal interns, levels of proficiency including depth, breadth, knowledge, skill and evidence of demonstration may be modified as deemed appropriate by the evaluator.</p>	<p>Unsatisfactory describes leaders who are inadequate. They do not understand what is required for proficiency or have demonstrated through their action and inaction that they choose not to strive for improvement. The goal is to identify, define, and document inadequate performance and make necessary changes very quickly.</p>

Domain 1: Student Achievement

Leaders in education make student learning their top priority. They direct energy and resources toward data analysis for instructional improvement, development and implementation of quality standards-based curricula and evaluate, monitor, and provide feedback to staff on instructional delivery.
