Dear Susan Bunting,

God's Liberty & Free Will are the foundations of a once free society like America. Individual responsibility & freedom to do what is best for me & my family is paramount! Government mandates based on fear, not science nor common sense, on the majority during the CovidChaos in 2020 stifled (killed) life, liberty, families, education, business & growth, to name a few. Do you remember when Dr. Fauci said masks don't work...the CDC said that vaccinated people won't have to wear masks? Did you know that only one study (of the numerous scientific studies) addressed if masks reduce Covid transmission in children & the results were inconclusive? Many studies indicate that the virus does not impact children like older adults. So, show me the science since you theorize that "masks can't do any harm!" What if we simply quarantined the most vulnerable such as the elderly or people with comorbidities (lessons learned from common flu) & encouraged vaccinations for those most likely to die, not the other 99.995% who will survive? Sound familiar...have we learned anything from our history of pandemics, flu seasons & other viral contagions? This decision is evidence...No, if you continue down the path of pure folly! Please stop the madness! Faith over fear is my motto...I trust God to see us through each trial & crisis. He sure is getting our attention (Amen) & I pray that you know His truth. God is sovereign & in control, not President Biden, Dr. Fauci, the CDC, Dept of Health nor you. Please follow the path of liberty, not tyranny...your oath matters! Our country & the citizens of DE need you to stand strong & be courageous in such a time as this. Do right things...personal responsibility is essential! As an adult & parent, I know what is best for me & my family, not you!

Dear Susan Bunting,

Masks should not be mandated for our children. Masks hinder learning while harming children emotionally, socially and physically. Masks can be breeding grounds for bacteria, mold and fungi and cause disease. Parents and families are the ones to decide what's best for their children...NOT the government!

Dear Susan Bunting,

It should be the right of every parent and family to decide what is best for their children. This is a fundamental right that imposes the responsibility for children until the age of 18. The government should not deny this right unless government takes full responsibility for all children at all times during their upbringing. I observe that government falls short of 100% control over anything that the public in general face. Governor, we have all been taught that absolute power corrupts absolutely. Use your power wisely with compassion for parents. Thank you

Dear Susan Bunting,

Given the emotional, psychological, physical, and academic damages that masking and other harsh restrictions caused, as well as the extremely low health risk at this time for the children, and parental distress over the new mandate for all public and private school children k-12, I respectfully ask that you cancel this mandate to force children to wear masks during school hours and allow the children breathing space and the freedom to learn, study, and listen during school naturally without unnecessary and unhealthy stress for children and grief for their parents. Thank you and God bless you and your family. Mrs. Maria E. Poptanich

Dear Susan Bunting,

Why do you think it is ok to take our freedom of choice away? You are not my children's parent, I am. Masks should be a choice not a mandate. This is child abuse to force our children to wear masks at school all day. My 5 year old won't be able to see her teacher smile. So how will she not trust her/him? She has never been to daycare or a babysitter. She will be around strangers with masks. Not to mention they will be breathing toxins in from paper masks. Also, DR. Fauci has said on video, cloth masks are ineffective. Give us our freedoms back!

Dear Susan Bunting,

If the vaccine is as effective as people claim it is then let the unvaccinated weigh the risk and make a personal choice. No human should be forced to be vaccinated or masked. America was founded on freedom and liberty and both of those come with consequences. Let people make the choice themselves and either reap the reward or suffer the consequences. Life needs to move on! Stop the poor kids mask mandate!

Dear Susan Bunting,

All I'm asking is that you take into consideration the younger children the kindergartners and first graders etc. that are not very familiar with wearing a mask for nine hours a day if not more five days a week. Especially as we get into the colder months you're going to have children sneezing into their masks which is just going to blow back into their immune system they're breathing in their own carbon and germs. Many children are going to be playing with their masks the teachers will have to spend more time focusing on the students and getting them to stop playing with their masks then actually focusing on the curriculum and the agenda for that day for them to learn. These children elementary school, high school and middle school have all been hanging out with friends all summer they have been on travel baseball teams doing sports in general they were just looking forward to a school year all before Covid. So please let's easy up on the mask mandate. It's not fair!!!

Dear Susan Bunting,

I know you want what is best for the families of Delaware, so I'm having a hard time understanding why you think it is a good thing to require our children to wear masks at school. It has been proven that children are not at risk and if parents do not want their children to wear masks then, I believe, they shouldn't have to. In addition I think it's clear that the significant negative physical, psychological, developmental, social and academic concerns far outweigh any perceived benefit of mask wearing. Please reconsider this decision for the sake of the children and families of Delaware. Respectfully, Forrust G. Miller

Dear Susan Bunting,

Take the politics away and make the decision to remove the mask from schools. Science says that the covid virus is small enough to pass through masks anyway - so what's the point? We are damaging our future generation with this mask. Kids cannot learn to read without seeing their teachers mouths, and the mask hinders social and academic development.

Dear Susan Bunting,

I was very saddened to see that you issued a mandate requiring all school children to wear masks when they return to school. My children remained virtual all year last year specifically because I knew that my child who suffers from anxiety would not be able to learn in an environment wearing a mask. But the toll that staying home took on her sent her into even deeper battle with anxiety and depression. She needs to be in school this year, but not masked the entire time. Please Governor, have faith in our schools to be able to follow the social distancing guidelines set in place and allow children to unmask while they can social distance and are seated at their desks. Allow families to make the choice on what is best for their children. Governor, we are setting these children up for failure. We are creating a generation of children that are so riddled with mental illness that they can not cope.

Dear Susan Bunting,

Your order to mandate masks for all children in K-12 schools is not grounded in science or common sense. Cloth masks, surgical masks, and N95 masks do not stop the COVID-19 virus, nor are they designed to in any case. If they did, after 7 months of wearing them, the horrible months of December 2020 and January 2021 would never have occurred with all the deaths and cases then. Children are not the victims nor the carriers of this virus. You are forcing them to breathe in the products of their biological waste products. You ignore the harmful sociological stigma of wearing masks. You are doing this for control, and not for mitigation of the virus. We learned the hard way that masks, lockdowns, separation of distance, and closure of small businesses, does not work. Yet you don't give us early treatment options or guidance. I can only conclude that you simply wish to control and harm the population, starting with the most vulnerable--- children. There is no study you can point to that says any mask can stop the COVID-19 virus. You need to rescind this ridiculous order now. Our children have suffered quite enough and lost enough classroom time.

Dear Susan Bunting,

I pray for you often. For your protection, to be brave, stand up for the community- and not be a puppet. Please Stop the mask mandate for our children K -12th grades; as well as "experimental Vaccine "mandate and keep our state open

Dear Susan Bunting,

It should not be your arbitrary decision to put face diapers on our children. It is not healthy and it should be parents choice on whether or not they mask. Studies show masking doesn't prevent the spread of virus nano particles so it's worthless anyway.

Dear Susan Bunting,

We are very discouraged over the decision to mandate the wearing of masks for children. It should be the right of every parent and family to decide what is best for our children, not the government.

Dear Susan Bunting,

As a respiratory therapist working in the hospital setting, the recent mask/vaccination mandates put forth are a gross governmental overreach and will have detrimental effects to personal healthcare autonomy. It has been increasingly difficult as a hospital respiratory therapist to continue to enjoy doing what I do in a hospital setting. Hospital staff that have continually come in contact with COVID patients are becoming weary of the ever-changing rules and standards put forth by those that are not on the frontlines. We are carrying a large burden and your mandates have made it much more difficult to express healthcare choice, which is a personal decision and should never be mandated. The staffing problems have been an ongoing issue and will only grow worse as their arms are being twisted into submission. These mandates will continue to divide and destroy the morale of those fighting to stay in the healthcare field.

Dear Susan Bunting,

The recent decision to mandate masks for children in K-12th grades is overstepping the rights of parents. Please reconsider. Thanks.

Dear Susan Bunting,

Please don't require our children to wear masks. They need to see their teacher's smiles and emotions. There emotional well being is more important.

Dear Susan Bunting,

Please unmask our children. I am a mother of four children. My kids attend a private school in Delaware. We don't receive any government funding at our school and just want to be left alone. Please allow parents to be parents and make choices that we think are best for our kids. I beg of you to take a stand and help stop this government overreach. People are depending on you.

Dear Susan Bunting,

I am in agreement with allowing parents to make the mask decision their own. Each child is different emotionally as well as physically. Parents can research to determine what choice is best for their children.

Dear Susan Bunting,

With all do due respect your mask mandate for children is pushing your authority. My child my choice is how it should go. My son is behind because at 2 he was forced to transfer from in person speech therapy to zoom, and at 3 he went in person with NO MASK and has been thriving. You expect a 3 year old with a speech delay to now not only be able to NOT see his teachers mouth to further develop speech, but then also restrict theirs with a mask. Insanity!! You and the school board should be held liable for failure to uphold students IEP's to the standards they deserve.

Dear Susan Bunting,

You do NOT own my children! Nor does the government or the state! I make the decisions necessary for the welfare of MY family. Masks on children are nothing but ABUSE. You are abusing the population with the LEAST risk of transmission. If you "followed the science," you would know that. You're nothing but a follower. You have forgotten that YOU work for US--not the other way around!!

Dear Susan Bunting,

Please end the mask mandate for our children and grandchildren. I truly believe that the cloth masks offer very little or no protection for our children. However, I do believe they are an educational, psychological, and social detriment. Parents should have the choice to choose which option is best for their child. It really makes very little sense to start a mask mandate now when they have been out maskless all summer.
