Clayton County Public Schools**

Teacher: Second Grade Team Grade: Second Week of: 9-12-16 Subject: Social Studies

Getting Started	Monday Social Studies	Tuesday Social Studies	Wednesday Social Studies	Thursday Social Studies	Friday Social Studies
<p>Expected Outcomes</p>	<p>SS2G1 The student will locate major topographical features of Georgia and will describe how these features define Georgia's surface.</p> <p>a. Locate all the geographic regions of Georgia: Blue Ridge Mountains, Piedmont, Coastal Plain, Valley and Ridge, and Appalachian Plateau.</p> <p>Learning Target: I can locate the Appalachian Plateau region of Georgia as well as describe the topographical features of the region.</p>	<p>SS2G1 The student will locate major topographical features of Georgia and will describe how these features define Georgia's surface.</p> <p>a. Locate all the geographic regions of Georgia: Blue Ridge Mountains, Piedmont, Coastal Plain, Valley and Ridge, and Appalachian Plateau.</p> <p>Learning Target: I can locate the Ridge and Valley region of Georgia and describe its topographical features.</p>	<p>SS2G1 The student will locate major topographical features of Georgia and will describe how these features define Georgia's surface.</p> <p>a. Locate all the geographic regions of Georgia: Blue Ridge Mountains, Piedmont, Coastal Plain, Valley and Ridge, and Appalachian Plateau.</p> <p>Learning Targets: I can locate the Coastal Plain region of Georgia and describe its topographical features.</p>

<p>Direct Explanation (Explain what students should know and be able to do and how they will be assessed.)</p>	<p>The students should understand that the location of each of Georgia's regions determines its topographical features.</p> <p>The teacher will unpack the standard, identify the learning target, and introduce the vocabulary words for the week. TTW provide examples for each vocabulary word.</p> <p>Vocabulary: Region Topography plateau</p> <p>Assessment: TSW be assessed identifying the topography of the Appalachian Plateau</p>	<p>The students should understand that the location of each of Georgia's regions determines its topographical features.</p> <p>The teacher will review the standard, state the learning target for today as well as introduce or review vocabulary pertinent to today's lesson</p> <p>Vocabulary: Region Topography Valley ridge</p> <p>Assessment: TSW be assessed by identifying the topography of the Ridge and Valley region.</p>	<p>The students should understand that the location of each of Georgia's regions determines its topographical features.</p> <p>The teacher will review the standard, discuss today's learning target, and introduce or review pertinent vocabulary.</p> <p>Vocabulary: Region Topography Mountain</p> <p>Assessment: TSW be assessed by identifying the topography of the Blue Ridge Mountains.</p>	<p>The students should understand that the location of each of Georgia's regions determines its topographical features.</p> <p>The teacher will review the standard, identify the learning target, and introduce or review the vocabulary words pertinent to the lesson.</p> <p>Vocabulary: Region Topography</p> <p>Assessment: TSW be assessed by identifying the topography of the Piedmont region.</p>	<p>The students should understand that the location of each of Georgia's regions determines its topographical features.</p> <p>The teacher will review the standard, identify the learning target, and introduce or review the vocabulary words pertinent to the lesson.</p> <p>Vocabulary: Region Topography Coast Plain</p> <p>Assessment: TSW be assessed by identifying the topography of the Coastal Plain region.</p>

<p>Modeling the Lesson's Concepts (Demonstrate the knowledge and skills for the lesson's concepts.)</p> <p>*I Do Period *Think Aloud *“What do I think about when I decide a main idea of a text?”</p>	<p>TTW locate the Appalachian Plateau region on a map of Georgia.</p> <p>Using the following link for the Slide Share presentation TTW explain and describe the topography of the region http://www.slideshare.net/lovelylibrarian/5-regions-of-georgia</p> <p>Students can draw a picture of the landforms in this region on their notes.</p>	<p>TTW locate the Ridge and Valley region on a map of Georgia.</p> <p>Using the following link for the Slide Share presentation TTW explain and describe the topography of the region http://www.slideshare.net/lovelylibrarian/5-regions-of-georgia</p> <p>Students can draw a picture of the landforms in this region on their notes.</p>	<p>TTW locate the Blue Ridge Mountains region on a map of Georgia.</p> <p>Using the following link for the Slide Share presentation TTW explain and describe the topography of the region http://www.slideshare.net/lovelylibrarian/5-regions-of-georgia</p> <p>Students can draw a picture of the landforms in this region on their notes.</p>	<p>TTW locate the Piedmont region on a map of Georgia.</p> <p>Using the following link for the Slide Share presentation TTW explain and describe the topography of the region http://www.slideshare.net/lovelylibrarian/5-regions-of-georgia</p> <p>Students can draw a picture of the landforms in this region on their notes.</p>	<p>TTW locate the Coastal Plain region on a map of Georgia.</p> <p>Using the following link for the Slide Share presentation TTW explain and describe the topography of the region http://www.slideshare.net/lovelylibrarian/5-regions-of-georgia</p> <p>Students can draw a picture of the landforms in this region on their notes.</p>
<p>Guided Practice with Feedback (Provide students with opportunities to practice the concepts and skills with teacher guidance and corrective feedback.)</p>	<p>TSW take notes about the Appalachian Plateau region including landforms, climate, wildlife, plants/crops, and attractions or interesting facts.</p> <p>Students will also locate and identify the region on a map of Georgia and color it yellow.</p>	<p>TSW take notes about the Valley and Ridge region including landforms, climate, wildlife, plants/crops, and attractions or interesting facts.</p> <p>Students will also locate and identify the region on a map of Georgia and color it brown.</p>	<p>TSW take notes about the Blue Ridge Mountains region including landforms, climate, wildlife, plants/crops, and attractions or interesting facts.</p> <p>Students will also locate and identify the region on a map of Georgia and color it blue.</p>	<p>TSW take notes about the Piedmont region including landforms, climate, wildlife, plants/crops, and attractions or interesting facts.</p> <p>Students will also locate and identify the region on a map of Georgia and color it green.</p>	<p>TSW take notes about the Coastal Plain region including landforms, climate, wildlife, plants/crops, and attractions or interesting facts.</p> <p>Students will also locate and identify the region on a map of Georgia and color it orange.</p>
<p>Working Together and Independent Practice: (Allow students to practice the concepts)</p>	<p>Students will complete p. 4 in the Social Studies workbook.</p>	<p>Students will complete p. 5 in the Social Studies workbook.</p>	<p>Students will complete p. 6 in the Social Studies workbook.</p>	<p>Students will complete p. 7 in the Social Studies workbook.</p>	<p>Students will complete p. 9 in the Social Studies workbook.</p>

independently using the lesson's skills, language and/or practices.)					
Review/ Assessment of Standard and Learning Objectives (Perform an assessment of students' knowledge and skill)	TTW review the learning targets and standard with the students.	TTW review the learning targets and standard with the students.	TTW review the learning targets and standard with the students.	TTW review the learning targets and standard with the students. The students can use their notes to quickly match definitions learned with terms learned.	TSW show their understanding of the five regions of Georgia and their topography by completing a cut n paste activity in which they read details and determine which region that detail describes and glue it in the appropriate box.
