CHAPTER 1
Addition and Subtraction Within 1,000

Lesson 1.11 Combine Place Values to Subtract

This lesson works another strategy for subtraction called combining place values.

Ex: 431-227

First estimate to check your answer.
```
  430
 -225
  205
```

Then line your numbers up.
```
 431          Since you cannot subtract 7 from 1, think about it being 31-27=04
-227
 204
```

EX:
```
 513
-482          Since you cannot subtract 8 from 1, think about it being 51-48=3
  31
```
