

Studying at home

How to survive and thrive

Studying at home

- Organizing at home
- Homework vs. Tests
- Motivate and Monitor

Organizing at home

Organizing at home

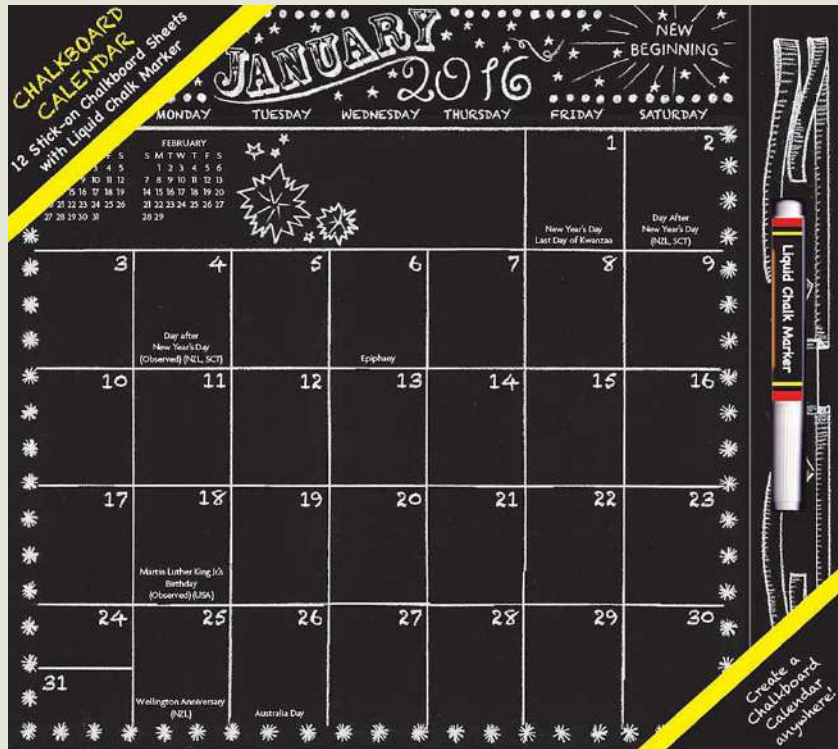

Consistent Space & time

- When?
- Kitchen vs. Bedroom
- Table
- Tools needed

Electronics

- Television
- Music
- Phone
- Computer

Organizing at home

- Test dates
- Homework due dates
- Color Code
- Set your own deadlines

Homework vs. Tests

Homework

- Prioritize
 - Length of Assignment
 - When is it due
- Break up by type of assignment
- Take a break
- **TURN IT IN**

Instead of doing our homework we like to worry how much we have to do!

Homework vs. Tests

- “Rereading” is not the best strategy
 - Highlight notes
 - Flash cards
 - Rewriting
 - Q & A Recall

Monitor and Motivate

- Look at the homework and ask questions:
 - About structure:
 - Where do you think you should start?
 - Which assignment do you think will be the longest / hardest / easiest?
 - Where do you think you should start?
 - What do you need to do this assignment? Do you have your tools?
 - About content:
 - Tell me more about this part..
 - What is this question asking you?
 - How did you solve this problem?

Monitor and Motivate

- Acknowledge frustration:
 - What did you do the last time you got stuck?
 - If your teacher was here what question would you ask? What do you think they would answer? Can we look for an answer?
- Praise progress:
 - Last time you studied using flash cards and you got a great score. Are you going to do that again?
 - You thought this project was huge and you're already half way through because you stuck to your plan. That's wonderful!
 - So X happened and Y didn't get done. How can we adjust our plan to fit it in?

Success is no accident. It is hard work, perseverance, learning, studying, sacrifice and most of all, love of what you are doing or learning to do
