

Clayton County Public Schools desires for every student to graduate with the ability to read proficiently and critically in order to use knowledge to solve problems and to have a high quality of life.

Important Facts about Reading:

- Third graders who are **not** reading at grade level are the most vulnerable to drop out of school later (Annie E. Casey Foundation).
- High school graduates who struggle with reading and writing are at risk of either not attending or dropping out of college or other post-secondary training opportunities due to not having the skills to meet the reading and writing demands. Not having a post-secondary degree and/or training may lead to limited employability skills and limited options in life.

The Five P's of Successfully Supporting Learning at Home

- **Purpose:** Emphasize frequently to your child why he/she is in school and what learning means for his/her future.
- **Present:** Ensure your child is present every day and has the necessary supplies.
- **Place:** Secure a place at home that is conducive to reading, studying, and completing homework assignments.
- **Partnership:** Establish a strong partnership with the school to support positive outcomes for your child. Stay informed by ensuring your contact information is updated and that you have access to the Infinite Campus Parent Portal. Attend parent academies or workshops hosted by the school or district.
- **Plan:** Have a plan for success! Encourage your child to set personal and academic goals and regularly revisit these goals to ensure he/she is on track for success. Check your child's grades regularly in Infinite Campus.

Strategies for Supporting Literacy at Home

- ★ Emphasize the importance of your child reading and writing regularly to improve their ability to learn new concepts at school.
- ★ Set aside time each day at home for your child to read for at least 20 minutes every day. Use 1-2 of the resources below to support reading at home.
- ★ Parents are encouraged to read to their infants and toddlers daily to build their knowledge, vocabulary, and oral language skills.
- ★ Have your child write about what they are reading. Allow toddlers to engage in "practice writing," such as drawing and scribbling, and have children describe their writing to you to build their ability to express themselves.
- ★ Encourage your child to use the new vocabulary words they are adopting each day when writing and speaking.
- ★ Have a way to monitor if your child's reading and writing skills are improving. Look at classroom grades, assessment data, listen for more fluent and accurate reading and their ability to understand what they are reading. Students' writing should include the following: focused on a clear topic, related supported details, complete sentences, and correct grammar and punctuation.
