

Surface Area and Volume

Day 1 - Surface Area of Prisms

Surface Area = The total area of the surface of a three-dimensional object

(Or think of it as the amount of paper you'll need to wrap the shape.)

Prism = A solid object that has two identical ends and all flat sides.

We will start with 2 prisms – a rectangular prism and a triangular prism.

Rectangular Prism

Triangular Prism

Surface Area (SA) of a Rectangular Prism

Surface Area of a Prism

of sides)

Prism net - unfolded

Rectangular Prism

Rectangular Prism

$$B = 4 \times 6 \times 2 = 60$$

$$C = 4 \times 6 = 24 \times 2 = 48$$

$$148 \text{ in}^2$$

each of the faces.

any of the faces have the
area?

If so, what

$$SA = 2lw + 2lh + 2wh$$

$$SA = 2(10 \times 5) + 2(10 \times 6) + 2(5 \times 6)$$

$$= 2(50) + 2(60) + 2(30)$$

$$= 100 + 120 + 60$$

$$= 280 \text{ units squared}$$

Practice

A stylized teal hand is shown in the lower right quadrant, pointing towards the equation. The hand is rendered in a dark teal color with a slight gradient, giving it a three-dimensional appearance. The index finger is extended towards the equation.
$$\begin{aligned} \text{SA} &= 2lw + 2lh + 2wh \\ &= 2(22 \times 10) + 2(22 \times 12) + 2(10 \times 12) \\ &= 2(220) + 2(264) + 2(120) \\ &= 440 + 528 + 240 \\ &= \mathbf{1208 \text{ ft squared}} \end{aligned}$$

CUBE

of the

$$4 \times 4 = 16$$

$$\underline{\times 6}$$

$$96$$

Take

Surface Area of a Triangular Prism

sides
(rectangular)

Unfolded net of a triangular prism

Triangular prism

2(area of triangle) + Area of rectangles

$$\begin{aligned}\text{Area Triangles} &= \frac{1}{2} (b \times h) \\ &= \frac{1}{2} (12 \times 15) \\ &= \frac{1}{2} (180) \\ &= 90\end{aligned}$$

$$\begin{aligned}\text{Area Rect. 1} &= b \times h \\ &= 12 \times 25 \\ &= 300\end{aligned}$$

$$\begin{aligned}\text{Area Rect. 2} &= 25 \times 20 \\ &= 500\end{aligned}$$

$$\text{SA} = 90 + 90 + 300 + 500 + 500$$

$$\text{SA} = 1480 \text{ ft squared}$$

TRIANGULAR PRISM

5

of prism

Find the surface area. Start by finding the area of the triangle.

$$4 \times 3/2 = 6$$

$$\times 2 = 12$$

How many triangles were there?

2

Find the area of the 3 rectangles.

$$5 \times 10 = 50 = \text{front}$$

$$4 \times 10 = 40 = \text{back}$$

$$\underline{3 \times 10 = 30 = \text{bottom}}$$

What is the final SA?

$$\text{SA} = 132 \text{ m}^2$$

Practice

$$\text{Triangles} = \frac{1}{2} (b \times h)$$

$$= \frac{1}{2} (8 \times 7)$$

$$= \frac{1}{2} (56)$$

$$= 28 \text{ cm}$$

$$\text{Rectangle 1} = 10 \times 8$$

$$= 80 \text{ cm}$$

$$\text{Rectangle 2} = 9 \times 10$$

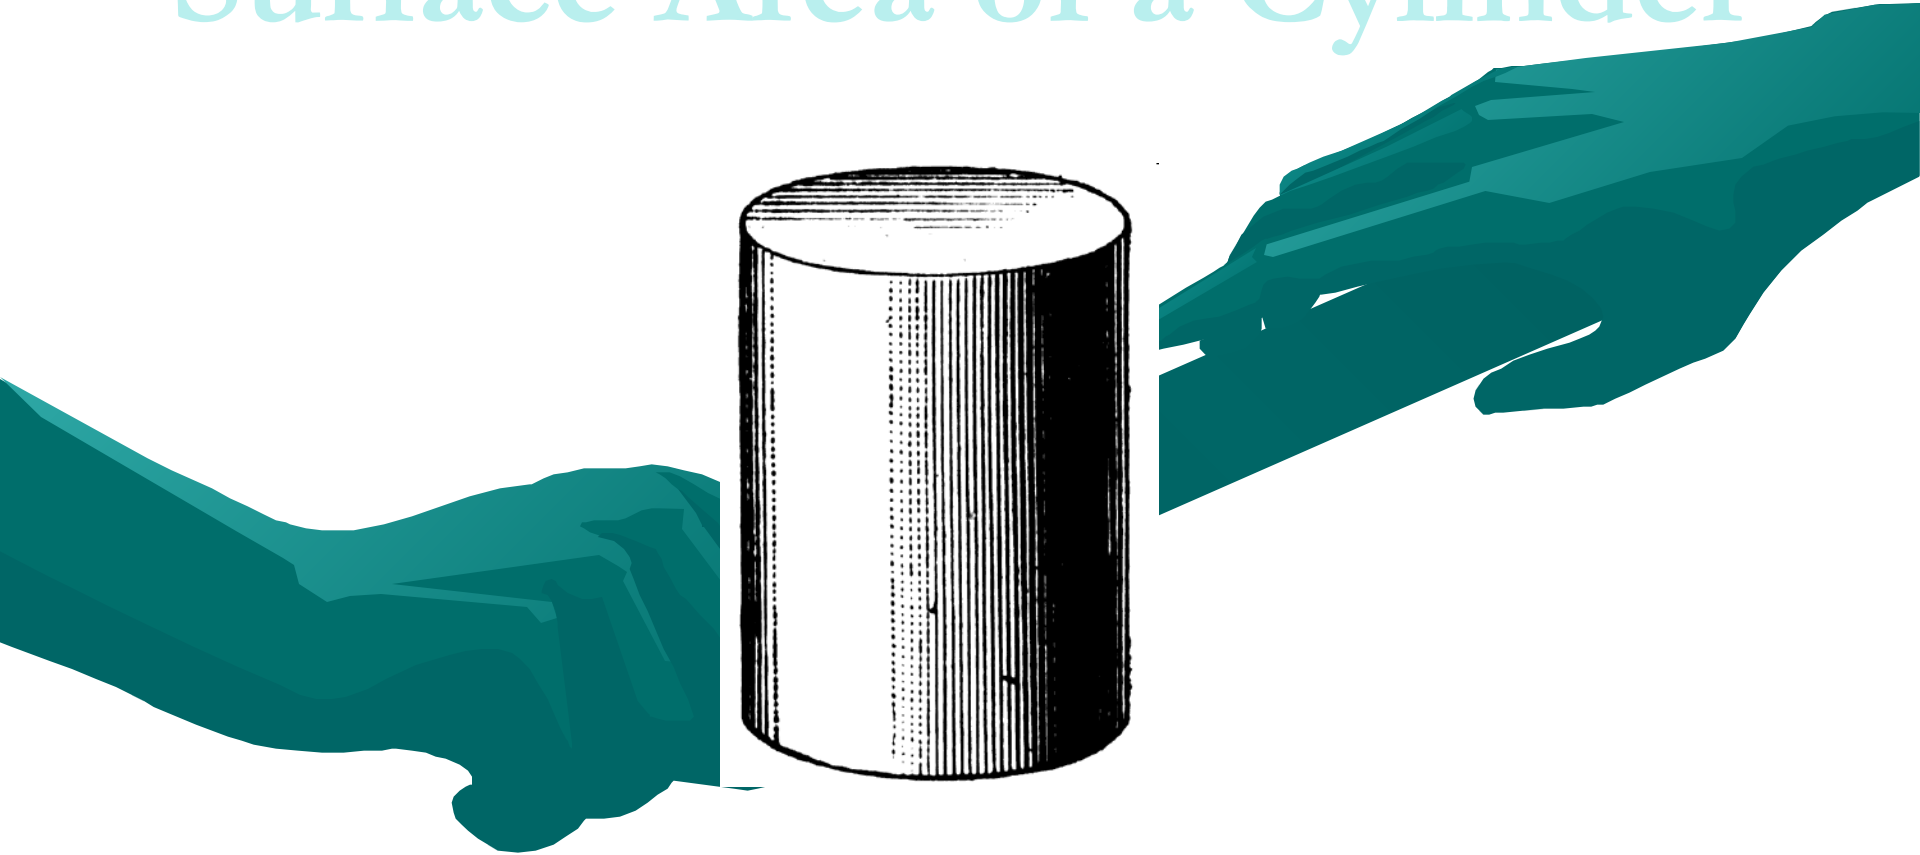

$$= 90 \text{ cm}$$

Add them all up

$$\text{SA} = 28 + 28 + 80 + 90 + 90$$

$$\text{SA} = \mathbf{316 \text{ cm squared}}$$

Surface Area of a Cylinder

Review

are shape
e parts.

anner for the

Surface Area (SA)

Parts of a cylinder

Put together they make

The Soup Can

The top and the label are related

The circumference of the top

is the same as the length of the label

Area of the Circles

But there are 2 of them so
 $28.26 \times 2 = 56.52$ units squared

The Rectangle

Notice that the base is the same as the distance from the center of the circle (or the center of the sphere).

Find Circumference

$$= 18.84 \times 6 \text{ (the height given)}$$

$$= 113.04 \text{ units squared}$$

Add them together

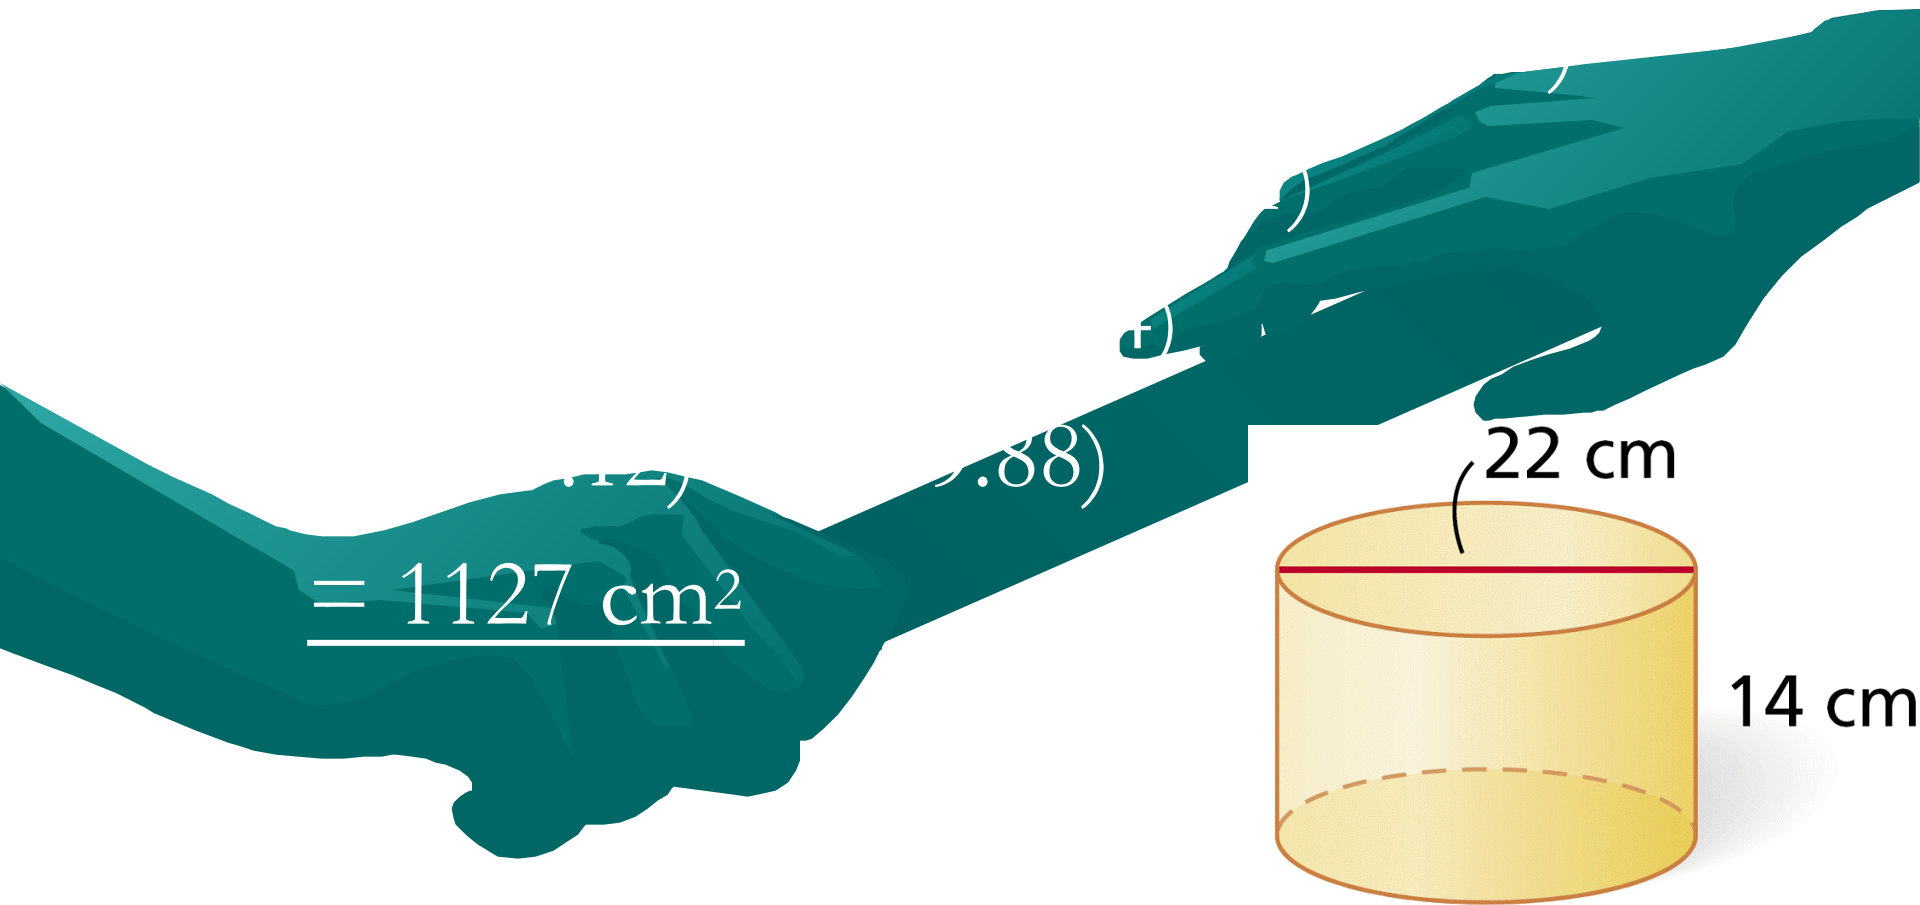

The total Surface Area

Formula

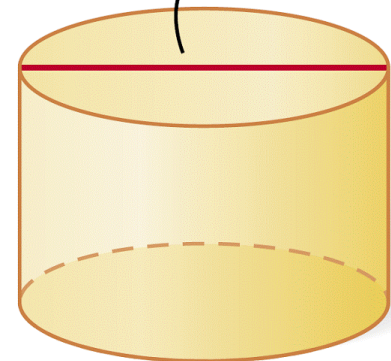

Practice

Be sure you know the difference between a radius and a diameter!

More Practice!

$$\begin{aligned} & - (241.78) + (596.54) \\ & = \underline{838.32 \text{ cm}^2} \end{aligned}$$

Volume of Prisms and Cylinders

Volume

- The number of cubic units needed to fill the shape.

Find the volume of this prism by counting how many cubes tall, long, and wide the prism is and then multiplying.

- There are 24 cubes in the prism, so the volume is 24 cubic units.

$$2 \times 3 \times 4 = 24$$

2 – height

3 – width

4 – length

Formula for Prisms

VOLUME OF A PRISM

height

*Note – the capital letter stands for the
BASE not the length*

Try It

$$V = Bh$$

Find area of the base

$$= (8 \times 4) \times 3$$

$$= (32) \times 3$$

Multiply it by the height

$$= \underline{96 \text{ ft}^3}$$

Practice

22 cm

12 cm

10 cm

$$\begin{aligned} V &= Bh \\ &= (22 \times 10) \times 12 \\ &= (220) \times 12 \\ &= \underline{2640 \text{ cm}^3} \end{aligned}$$

Cylinders

VOLUME OF A CYLINDER

Notice that πr^2 is the area of the base and h is the height.

Notice that πr^2 is the area of the base and h is the height.

Try It

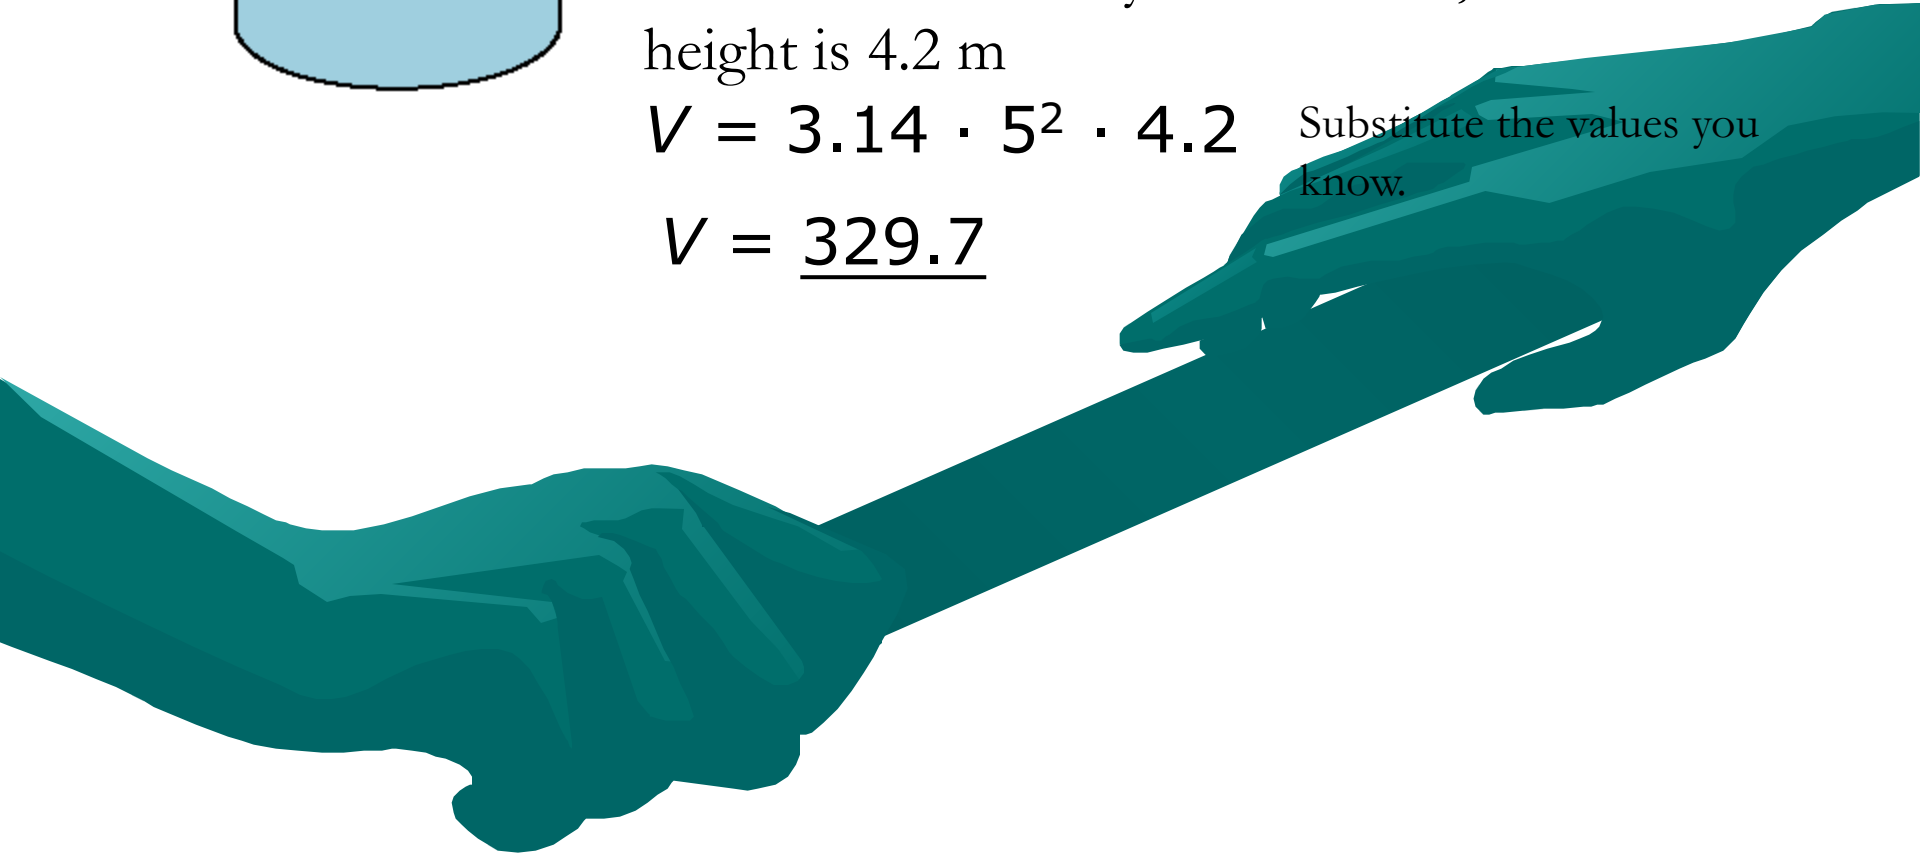

$$V = \pi r^2 h$$

The radius of the cylinder is 5 m, and the height is 4.2 m

$$V = 3.14 \cdot 5^2 \cdot 4.2$$

Substitute the values you know.

$$V = \underline{329.7}$$

Practice

$$V = \pi r^2 h$$

Start with the formula

$$V = 3.14 \times 13^2 \times 7$$

Substitute what you know

$$= 3.14 \times 169 \times 7$$

Solve using order of Ops.

$$= \underline{3714.62 \text{ cm}^3}$$

Lesson Quiz

$4,069.4 \text{ m}^3$

861.8 cm^3

3. triangular prism: base area
 312 ft^3

End of Day 4

Day 5

Volume of Pyramids

How much is the Volume of a
pyramid with base B and height h .
It will be less than that of the prism.

Volume of a Pyramid:

$V = (1/3)$ Area of the Base x height

$V = (1/3) Bh$

**Volume of a Pyramid = $1/3$ x Volume
of a Prism**

$$\begin{aligned} &= \frac{1}{3} (9 \times 9)(14) \\ &= \frac{1}{3} (81)(14) \\ &= \frac{1}{3} (1134) \\ &= \underline{378 \text{ cm}^3} \end{aligned}$$

Practice

5.55 units

Quiz

1.

2975 cm³

10 in.
