STREAM

Stream is for discovering images that people you follow have touched or tagged.

When you arrive at this screen you can begin to explore. The first option is to Find People You Know. Other options include search. By clicking Search you will have the opportunity to search by your topic and see what other thinglink users have created.

Hatchet

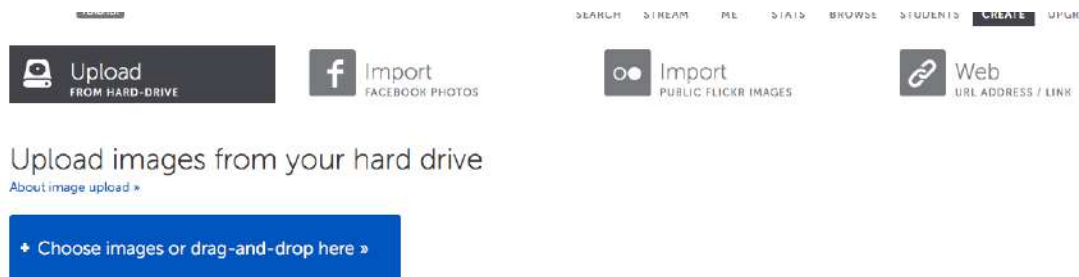

Terri L Falk

A happy ThingLink user.

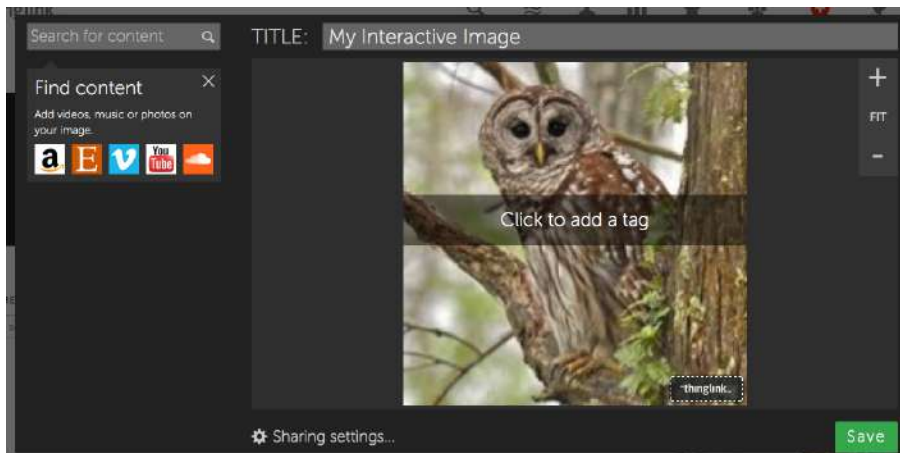

Be aware that many of the thinglinks are student created projects. There may or may not be samples that will meet your needs.

Create and start building your own!

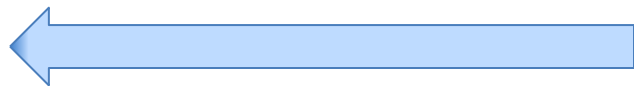

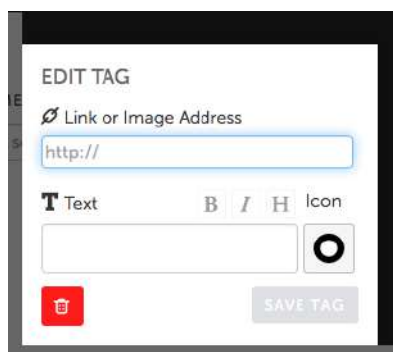

Next you will want to have an image selected and readily available to start your thinglink.

After you have dropped the image into your project, type in the name of your project.

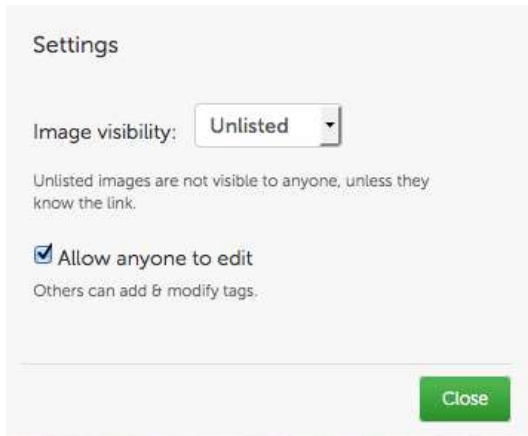

To begin adding icons with content such as text, and or video click on the image a pop-up block will appear in the bottom left corner.

Type in the text or link and then click on the icon to change the color and shape. Continue adding content until your thinglink is complete. Be sure to **SAVE!**

Open Sharing Settings and set them as listed below or as your teacher has directed.

Settings

Image visibility: Unlisted

Unlisted images are not visible to anyone, unless they know the link.

Allow anyone to edit
Others can add & modify tags.
