of learners.

WHAT IS TUTOR.COM?

- Tutor.com is a fully online tutoring service. Students will have access to a “LIVE” tutor 24/7 in more than 40 subjects including Math, Science, Social Studies, English, AP Support, Foreign Languages and Business. Tutoring sessions take place in an easy-to-use online classroom, which runs in your web browser or via phone call.
- The tutors can assist with studying, test prep and homework help.
- Tutor.Com philosophy is to help students understand the concepts behind what they are working on, so that our students can learn how to solve the problem and reach the answer on their own. Tutor.com is not an answer-giving service.

TUTOR.COM IS HERE TO HELP!!!!!!

			
Mixed up in math?	Science got you stumped?	Not feeling right about writing?	Feeling the pressure of your test prep?
We can Help!	We can Help!	We can Help!	We can Help!
On-demand tutoring, online. 	On-demand tutoring, online. 	On-demand tutoring, online. 	On-demand tutoring, online. 

Our tutor network includes certified teachers, college professors, graduate students and professionals with Masters Degrees, Ph.D.'s and Ivy League credentials.

Every tutor is vetted through a rigorous screening process with subject exams, mock tutoring sessions, mentor review and third-party background check.

Every tutor is skilled at tutoring in our online classroom and helping students understand concepts through a shared whiteboard, chat and file-sharing.

Who, What, Why and How

- Elementary School
- Middle School
- High School

THIS PROGRAM IS DESIGNED FOR ALL LEARNERS

**We've got you
covered.**

Over 250 subjects and test prep areas available.

MAXIMIZE THE MIDDLE!

Who: 6th – 8th Graders

Why: Stress, time management, self-esteem, parents can't help

What: Writing Skills, Mid-Level Math, Computer/Tech, More Structured Science

How: Tutoring, Drop-Off Reviews, Videos & Practice Quizzes

MEET GREG GO GETTER

Greg is a super prepared student who always tries to stay ahead of the game. He likes to be prepared, review, and hopes that these skills will pay off in the long run.

Greg needs reassurance that he's "got this" and also some time management tools to manage everything he has put on his plate.

When you visit Greg's class or see him stressing in the library, show him the longer promotional video. Encourage him to try the drop-off math review for his 8th grade algebra and to watch the video lessons when he needs a reminder. As always, make sure Greg knows our tutors are encouraging and educational.

How about 3?
00:18:16

I'll work it out on the board.
00:18:26

Perfect! When x is 3, y is 10.
00:19:17

Now, since this is a linear equation, it will create a line, so you only need to have two points in order to graph it.
00:19:58

Please put those two ordered pairs on the graph.
