Tutor.com Is here to help!!!!!!

What is tutor.com?

1. Tutor.com is a fully online tutoring service.
2. Students will have access to a “LIVE” tutor 24/7
 - Math, Science, Social Studies, English
 - AP Support
 - Foreign Languages and Business
3. Tutoring sessions take place in an easy-to-use online classroom, which runs in your web browser or via phone call.
 - The tutors can assist with studying, test prep and homework help.

Tutor.com Philosophy

To help students understand the concepts behind what they are working on, so that our students can learn how to solve the problem and reach the answer on their own.

Tutor.com is not an answer-giving service.

Our tutor network includes certified teachers, college professors, graduate students and professionals with Masters Degrees, Ph.D.'s and Ivy League credentials.

Every tutor is vetted through a rigorous screening process with subject exams, mock tutoring sessions, mentor review and third-party background check.

Every tutor is skilled at tutoring in our online classroom and helping students understand concepts through a shared whiteboard, chat and file-sharing.

This Program is designed for all learners.

We've got you covered.

Over 250 subjects and test prep areas available.

The following slides provide scenarios and successful uses of Tutor.com in the high school setting.

HOLY COW, IT'S HIGH SCHOOL!

Who: 9th – 12th Graders

Why: Balancing life, graduation requirements, rigor courses, college bound, job searching

What: core academics, writing skills, AP[®] courses, ACT/SAT, and the list goes on...

How: Everything in Learning Suite

MEET RENA RIGOR

Rena wants to fill her high school transcripts with rigor courses to help push her to the top of the college admissions' offices selection list. She'll fill her schedule with AP courses, for some of which she might not have had the best preparation.

AP and other rigor courses look appealing because they can result in college credit, higher GPA due to weighting and scholarships. For many students, though, they are an eye opener.

Make sure the AP teachers in your district high school are aware of Tutor.com, including our AP-level tutoring in 14 subjects as well as our AP video lessons. "Feeling the Pressure of Test Prep" posters are a great addition to their classrooms.

MEET AL ATHLETE

Up by 6:00 a.m. School from 7:30 – 2:30. Straight to practice by 2:45 and not home until 6:00 p.m. Brother-babysitting duty until 8:00. Algebra worksheet, English essay, biology lab report, Spanish test and history chapter drag on until 11:00 p.m.

Al does it all, but just as he needs coaching on the field, he also needs support in his studies and a little help managing his time.

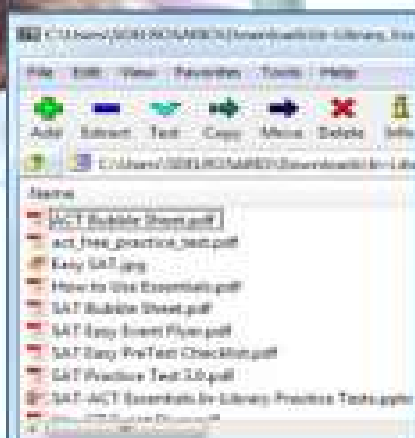

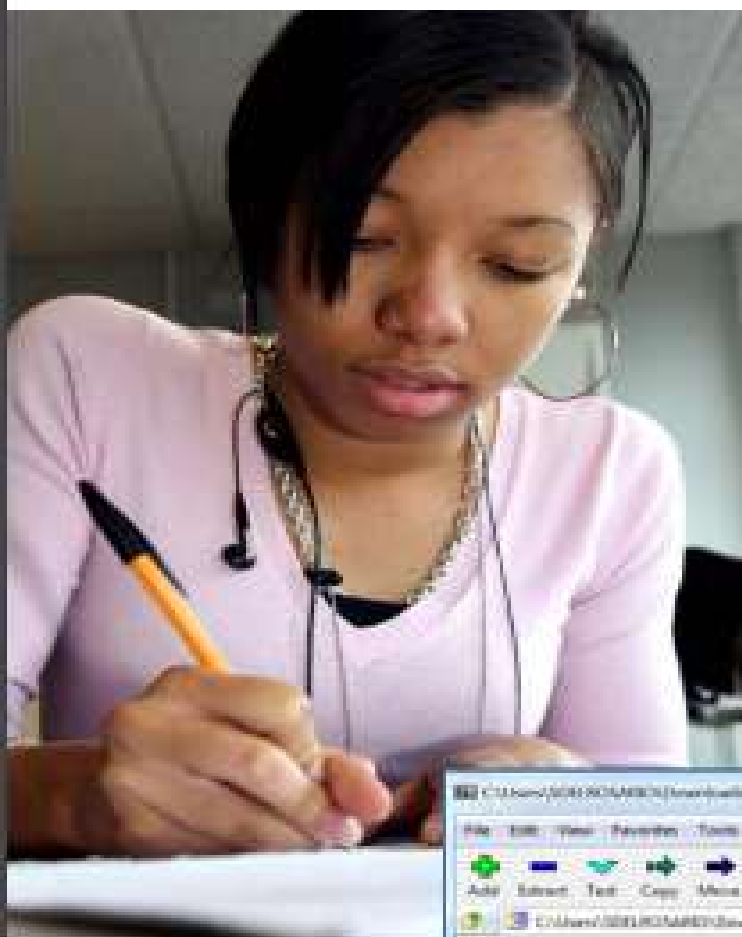

Drop-off reviews, short video lessons and late night tutoring availability can help Al make his study time more efficient AND effective. Be sure to let coaches know about Tutor.com, and not just at the school. Look for other athletic organizations like Pop Warner or Little League, gymnastics & cheerleading gyms, swim clubs and more.

**GET
BACK
IN THE
GAME!**

Don't let your schoolwork sideline you.
Let the experts at Tutor.com help you finish
your homework, study for your tests and
prepare your essays.

MEET COL LEDGE

Col needs to ace the ACT! She may even take the SAT to open up further merit scholarship opportunities. Test prep books are expensive and the ones in the library are often unavailable or outdated.

In addition to test prep, Col could use some advice on the Common App and financial aid. The path to college seems to be paved with potholes that make for a bumpy ride.

You can help Col, and others just like her, by introducing our SAT/ACT Essentials which includes not only test prep, but expert advice from The Princeton Review College Counselors. Hang fliers near your test prep books or put bookmarks in the college advice books in your stacks. Host an in-library practice test and use Essentials as your medium.

How about 3?
00:18:16

I'll work it out on the board.
00:18:26

Perfect! When x is 3, y is 10.
00:19:17

Now, since this is a linear equation, it will create a line, so you only need to have two points in order to graph it.
00:19:58

Please put those two ordered pairs on the graph.
00:20:06
