Review Your Answers: Math Student- Produced Response

Math 52

SECTION 4

Student-Produced Responses

Question	Correct Answer(s)	Your Answer	Difficulty	Content
29	7	✓	m	Alg
30	3	o	m	Geo
31	4.5 or 9/2	o	m	Num
32	1000	✓	m	Geo
33	10, 12, 14, or 16	✓	h	Arth
34	8/5 or 1.6	o	h	Alg
35	29	✓	h	Arth
36	108	50.9	h	Geo
37	42	4.2	m	Data
38	8	10	h	Num

Answer Summary & Scoring

- Correct answer = plus 1 point
- Omitted answers = no points
- Wrong answers to multiple-choice questions = minus $\frac{1}{4}$ point. (To discourage students from blind or random guessing.)
- Wrong answers to math questions 29-38 (Student Produced Responses) = No points lost.

Ranges

20

46

54

You answered correctly **29** of **48** critical reading questions and earned **29** points.

11 of **14** easy questions

15 of **23** medium questions

3 of **11** hard questions

You omitted **1** question(s).

You answered incorrectly **18** question(s) and lost **5** point(s).

Improve Your Skills

- The skills listed are based on your individual performance.
- Follow the suggestions to improve in each area.

Improve Your Skills

The skills listed are based on

your individual performance

on the test and represent those that you have the best chance to improve with extra work.

Follow the suggestions to improve in each area.

■ Determining an author's purpose or perspective

How to improve: Authors write for a variety of purposes, such as to inform, to explain, or to convince. When you read, try to determine why the author wrote what he or she wrote.

See questions 20, 42, 48.

■ Understanding complex sentences

How to improve: Ask your English teacher to recommend books that are a bit more challenging than those you're used to reading. Practice breaking the sentences down into their component parts to improve your comprehension. Learn how dependent clauses and verb phrases function in sentences.

See questions 5, 33.

■ Understanding sentences that deal with scientific ideas

How to improve: Read magazine articles about scientific subjects to improve your comfort level in this area.

See questions 8, 36

National Merit Scholarship Corporation (NMSC) Programs

- Selection Index
- Percentile
- Entry Requirements

National Merit Scholarship Corporation (NMSC) Programs

Selection Index

146

Percentile

compares your performance
with college-bound juniors

47

The Selection Index (S.I.) is the sum of your critical reading, math, and writing skills scores. NMSC uses the S.I. as an initial screen of over 1.3 million students who enter its scholarship programs (see reverse).

Entry Requirements

Below is information you provided on your answer sheet.

Full-time high school student:

Yes

Year to complete high school and
enroll full time in college:

2006

Years to be spent in grades 9–12:

4

U.S. citizenship:

Yes

Based on your responses, you **do** meet requirements to enter NMSC year 2006 programs. If you are among 55,000 high scorers who qualify for program recognition, you will be notified next September.

Your Educational Plans

Based on the **college major** you provided on the answer sheet, this section will give you:

- Description of what college students learn and do with that major.
- Associated skills
- Recommended high school courses
- Other majors to consider
- Associated careers

Your Educational Plans

Grade Average **B**

College Major

Computer Engineering

Information above is self-reported.

Description: In the computer engineering major, students learn to design and develop computer and computer-related systems. These systems include software systems, hardware systems, and combined hardware/software systems. Students take courses in basic sciences, mathematics, and engineering science and design.

Associated Skills: Computing, basic sciences, mathematics.

Recommended High School Courses: English 4, precollege mathematics 4, biology 1, chemistry 1, physics 1, social studies 3-4, history 2-3, foreign language 2-4, music .5, visual arts .5, and computer science .5-1.

Other Majors to Consider: Aerospace/aeronautical engineering, Computer science, Electrical, electronics and communication engineering, Information sciences and systems, and Mathematics.

Careers: Accredited programs prepare their graduates for entry into any area of specialization within the computer engineering profession (design and development, manufacturing, protection, and marketing). Work in these areas can lead later to positions

Understanding PSAT/NMSQT Results, 11/04

After You Receive Your PSAT/NMSQT Score Report

- Review your answers using the test booklet

Name _____ Last _____ First _____ Middle Initial _____ **Form W**

PSAT/NMSQT®

**Preliminary SAT/
National Merit Scholarship Qualifying Test**

► **WEDNESDAY,
October 13,
2004**

(This is the authorized administration date of this test form for entry to scholarship and recognition programs.)

Timing The PSAT/NMSQT® has five sections. You will have 25 minutes each for Sections 1-4 and 30 minutes for Section 5.

Scoring For each correct answer, you receive one point. For questions you omit, you receive no points. For a wrong answer to a multiple-choice question, you lose a quarter ($\frac{1}{4}$) of a point. For a wrong answer to a math question that is not multiple choice, you do not lose any points.

Guessing If you can eliminate one or more choices as wrong, you increase your chances of choosing the correct answer and earning one point. If you can't eliminate any choices, move on. You can return to the question later if there is time.

Marking Answers You must mark all of your answers on your answer sheet to receive credit. Make sure each mark is dark and completely fills the oval. If you erase, do so completely. You may write in the test book, but you won't receive credit for anything you write there.

Checking Answers You may check your work on a particular section if you finish it before time is called, but you may not turn to any other section.

DO NOT OPEN THE TEST BOOK UNTIL YOU ARE TOLD TO DO SO!

Unauthorized reproduction or use of any part of this test is prohibited.

- Follow the suggestions for how to improve in the Improve Your Skills section

Improve Your Skills

The skills listed are based on *your individual performance* on the test and represent those that you have the best chance to improve with extra work.

Follow the suggestions to improve in each area.

■ Determining an author's purpose or perspective

How to improve: Authors write for a variety of purposes, such as to inform, to explain, or to convince. When you read, try to determine why the author wrote what he or she wrote.

See questions 20, 42, 48.

■ Understanding complex sentences

How to improve: Ask your English teacher to recommend books that are a bit more challenging than those you're used to reading. Practice breaking the sentences down into their component parts to improve your comprehension. Learn how dependent clauses and verb phrases function in sentences.

See questions 5, 33.

■ Understanding sentences that deal with scientific ideas

How to improve: Read magazine articles about scientific subjects to improve your comfort level in this area.

See questions 8, 36

■ Dealing with probability, basic statistics, charts, and graphs

How to improve: Practice solving problems that involve basic probability, basic counting, and finding the average (arithmetic mean), median, and mode. Look for charts and graphs in newspapers and magazines, and practice interpreting the data in them.

See questions 13, 14, 19.

■ Understanding geometry and coordinate geometry

How to improve: Review geometry units in your textbook involving perimeter, area, volume, circumference, angles, lines, slope. Familiarize yourself with the formulas given at the beginning of math sections of the test.

See questions 7, 11, 13.

■ Making connections among mathematical topics

How to improve: Practice problems that require combining skills acquired in different math courses, such as problems that use combinations of arithmetic, algebra, and geometry.

See questions 7, 11, 15.

■ Being precise and clear

How to improve: Learn to recognize sentence elements that are ambiguous and confusing. In your writing, choose words carefully and connect them for clear meaning.

See questions 4, 6, 8.

■ Recognizing logical connections within sentences and passages

How to improve: Use the writing process to help you revise your draft essays. Work with classmates and teachers to clarify meaning in your writing.

See questions 8, 28, 29.

After You Receive Your Score Report:

- Review the SAT Practice Essay and SAT Math Practice Questions on the back of your PSAT/NMSQT Score Report
- Go to collegeboard.com/psatextra for:
- Answers and explanations for these higher level-math questions
 - Essay directions, official scoring guide, and samples of student-written essays

Get Ready for the New SAT

Unlike the PSAT/NMSQT, the new SAT will have higher-level math questions and an essay assignment. To get ready for the SAT, write a practice essay and answer the math questions below; then go to www.collegeboard.com/psatextra for:

- answers and explanations for these higher-level math questions
- essay directions, official scoring guide, and samples of student-written essays
- answers and explanations for all questions on the 2004 PSAT/NMSQT

SAT Practice Essay

Think carefully about the issue presented in the following passage and the assignment below.

No one is so ignorant as the one who refuses to learn. To be truly successful, individuals must seek knowledge at every opportunity and must never be satisfied that they know all there is to know.

Assignment: How important is learning to success? Plan and write an essay in which you develop your point of view on this issue. Support your position with reasoning and examples taken from your reading, studies, experience, or observations.

SAT Math Practice Questions

- ① Based on the graph of the function f above, what are the values of x for which $f(x)$ is positive?
- (A) $-2 \leq x < 1$ or $8 < x \leq 10$
(B) $-2 \leq x < 1$ or $4 < x < 8$
(C) $1 < x < 4$ or $8 < x \leq 10$
(D) $-2 \leq x \leq 10$
(E) $1 < x < 8$

$$\begin{aligned} 2x - 5y &= 8 \\ 4x + ky &= 17 \end{aligned}$$

- ② For which of the following values of k will the system of equations above have no solution?
- (A) -10
(B) -5
(C) 0
(D) 5
(E) 10

- ③ The figure above shows three squares with sides of length 5, 7, and x , respectively. If A , B , and C lie on line ℓ , what is the value of x ?
