

Hello Parents,

The 6<sup>th</sup> grade math team has assembled opportunities for students to work on lessons to demonstrate their mastery of the 6<sup>th</sup> grade content. These assignments are optional, but successfully completed assignments in the USATestPrep system will be used to replace lower scores of the same standard in Infinite Campus.

Step 1: Check Infinite Campus for weak standards

Category: RP.1 - Ratios (weight: 1.0)						
Name	Due Date	Assigned Date	Weight	Pts Poss	Score	%
EOTT - RP.1 - Writing Ratios	10/07/2016	10/07/2016	1.0	100	50.20	50.2
Unit 2 Test - Ratios	11/04/2016	11/04/2016	1.0	100	80	80
Write Ratios Standard Check	09/27/2016	09/27/2016	1.0	100	80	80
RP.1 - Ratios Totals				300	210.2	70.06%

Step 2: Go to Mrs. Chaffin's webpage (DMS webpage → Teachers → Chaffin) and click the unit containing the weak standard(s). There you will find videos and links for practice, as well as, a Benchmark Test Code.

Step 3: Students should have already created a USATestPrep account and joined the appropriate math class period. Log in to USATestPrep: Dutchtown75, username (lunch number), password (initials & birthdate)

Step 4: For additional practice by standard, select the 6<sup>th</sup> grade milestones tab at the top and then select the MATH option.

Step 4: Scroll down to the correct domain to get started. The program has questions (quizzes with feedback for each response), vocabulary, videos and games for practice.

Step 5: When students feel they have adequately practiced, they may **Take a Benchmark** test in USATestPrep using the code found on my webpage for the weak standard(s). The score on this assessment will be used for grade recovery in Infinite Campus. **Students must turn in their work for each Benchmark Test to receive credit.**
