

Weathering, Erosion, Deposition Study Guide **Test 11-4**

1. What is erosion?
2. What factors will increase and decrease erosion?
3. What are the 4 main types of erosion?
4. What is weathering?
5. What is the difference in chemical and mechanical weathering?
6. What are the 4 types of chemical weathering? Include examples and pictures!
7. What are the 4 types of chemical weathering? Include examples and pictures!
8. What factors increase or decrease the rate of weathering?
9. What kind of rock is easily weathered chemically/mechanically?
10. What geologic impact do glaciers have?
11. What are the effects of run-off?
12. What landforms are created from water erosion?
13. What are the 4 types of mass movements?
14. How to identify each of the mass movements? Draw Pictures!
