IMPORTANT DATES:

April 3rd-7th: Spring Break

April 13th: 3rd Grade Field Trip to Macon Museum of Arts and Science

April 26th-28th: Georgia Milestones

April 28th: Relay for Life

Macon Museum of Arts and Science Field Trip

Our field trip will be on **April 13th**.

Relay for Life April 28th

Information was sent home about Relay for Life last Thursday in the Weekly Folder. If you would like to register for the survivor's dinner on the night of the relay, let me know so I can get you a registration form.

Week of: April 10-14

Learning Targets for this week:

ELA – I can find answers to specific questions within informational text that I read. I can use information from two passages to answer questions and form opinions.

Science - I can explain the difference between a rock and a mineral.

Writing - I can show that I know how to use words correctly when I write and speak.

Math – I can tell how much time has elapsed between two events. I can solve multiple-step math problems involving the four operations.

GOFAR

Make sure your child is practicing taking these tests online. I have emailed and messaged several codes for practice. Let me know if you need me to "reset" a test in case it times out.

Rocks and Minerals Science Vocabulary

mineral – a solid object found in nature that has never been alive

hardness – the measure of how difficult it is for a mineral to be scratched

rock – a naturally formed solid made of grains of one or more minerals

igneous rock – rock that was once melted and then cooled and hardened

sedimentary rock – rock made when materials settle into layers and get squeezed until they harden into rock

metamorphic rock – rock that has been changed by heat or pressure
