

## What do I need to make on my final if it counts 20% of my final grade????

Your final counts **20%** of your final grade. This means that the grade you see in the gradebook right now counts **80%** of your final grade. Please use this table to monitor what you will need to make on your final exam to pass, get an A, get a B, etc. for your final grade in the class. The grade is the grade you would AT LEAST need to make to get that final average. Note: The black areas indicate a situation that is not statistically possible (i.e., you would need to make a negative grade on your final or over a 100 on your final to achieve)

Current Grade	To Pass ( $\geq 70$ )	To get a C ( $\geq 74$ )	To get a B ( $\geq 80$ )	To get an A ( $\geq 90$ )
105				30
104				34
103				38
102				42
101				46
100			0	50
99			4	54
98			8	58
97			12	62
