

Puzzle 1

Fill in digits to make each equation true.
You may only use each digit (0-9) once.

$$\square \square 50 + \square \square 50 = 700$$

$$8 \square \square 2 - \square \square 21 = 371$$

$$\square \square 29 + 12 \square \square = 456$$

$$\square \square 00 - 15 \square \square = 442$$

$$\square 35 \square - 10 \square \square = 251$$

Puzzle 2

Fill in digits to make each equation true.
You may only use each digit (0-9) once.

$$150 + \square \square 0 \square \square = 759$$

$$\square \square 0 \square 0 - 187 = \square 5 \square 1 \square \square$$

$$\square 5 \square 2 \square \square + \square 1 \square 4 \square \square = 668$$

$$\square 6 \square \square \square \square - 531 = 111$$

$$\square 4 \square \square \square \square + 322 = 773$$

Puzzle 3

Fill in digits to make each equation true.
You may only use each digit (0-9) once.

$$\square \square 4 \square 0 + \square \square 6 \square 0 = 800$$

$$\square \square 0 \square 0 - \square \square 5 \square 5 = 545$$

$$351 + \square 4 \square \square = 818$$

$$541 - \square 2 \square \square = 257$$

$$785 - 682 = \square \square \square 3$$

Puzzle 4

Fill in digits to make each equation true.
You may only use each digit (0-9) once.

$$\square \square 0 \square 5 \square + \square 1 \square \square \square 7 \square = 912$$

$$\square \square \square 0 \square 0 \square - 271 = \square 3 \square \square \square 9$$

$$\square \square \square 2 \square 8 \square + \square \square \square 5 \square 6 \square = 484$$

$$\square \square \square 0 \square 5 \square - 100 = \square 6 \square 0 \square \square$$

$$\square 2 \square \square \square 3 \square + \square 3 \square \square \square 2 \square = 635$$
