

Wrapping Up Addition and Subtraction Within 1,000: Section B Checkpoint

1. Find the value of each difference. Use an algorithm or strategy of your choice.

a. $288 - 197$

b. $506 - 388$

2. Here is how Elena found the value of $731 - 498$.

$$498 + 2 = 500$$

$$500 + 200 = 700$$

$$700 + 30 = 730$$

$$730 + 1 = 731$$

$$200 + 30 + 2 + 1 = 233$$

Explain why Elena's strategy accurately finds the value of $731 - 498$.
