# Fraction Equivalence and Comparison: Section B Checkpoint

1. List two fractions that are equivalent to $\frac{3}{4}$. Explain or show your reasoning.

2. List two equivalent fractions that the point represents. Explain your reasoning.

3. To show that $\frac{7}{12}$ is equivalent to $\frac{14}{24}$, Kiran wrote: $\frac{2 \times 7}{2 \times 12} = \frac{14}{24}$. Do you agree with Kiran? Explain your reasoning.
