

# Lesson 1: Ways to Look at Figures

## Cool Down: What Do They Have in Common?

Here are five shapes that have some attributes in common.

Select **all** statements that are true about the attributes they share.

- A. Every shape has at least two sides that are the same length.
- B. Every shape has at least one right angle.
- C. Every shape has at least one pair of parallel sides.
- D. Every shape has sides of different lengths.
- E. Every shape has at least two angles that are the same size.
