Eureka Math

1st Grade
Module 4
Lesson 24

At the request of elementary teachers, a team of Bethel & Sumner educators met as a committee to create Eureka slideshow presentations. These presentations are not meant as a script, nor are they required to be used. Please customize as needed. Thank you to the many educators who contributed to this project!

Directions for customizing presentations are available on the next slide.

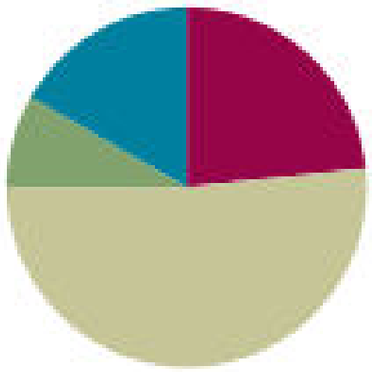
Lesson 24

Objective: Add a pair of two-digit numbers when the ones digits have a sum less than or equal to 10.

Suggested Lesson Structure

Application Problem	(5 minutes)
Fluency Practice	(14 minutes)
Concept Development	(31 minutes)
Student Debrief	(10 minutes)
Total Time	**(60 minutes)**



Materials Needed

- Fluency
  - (S) Core Fluency Practice Sets (Lesson 23)
  - (S) personal whiteboard
  - (S) die per pair of students
  - (T) 10 dimes and 10 pennies
  - (T) 100 bead Rekenrek
- Concept Development
  - (T) (T) 5 ten-sticks (3 red and 2 yellow), chart paper
  - (S) 4 ten-sticks from math toolkit,
  - (S) personal white board

I can add a pair of two-digit numbers when the ones digits have a sum less than or equal to 10.

Application Problem

A dog hides 11 bones behind his doghouse. Later, his owner gives him 5 more bones. How many bones does the dog have now? Use the RDW process to share your thinking as you solve the problem.

Extension: All the bones are brown or white. The same number of bones are brown as white. How many brown bones does the dog have?

Number Bond Additon and Subtraction (4 min.)

I will assign you a partner.

Both partners will chooose a whole number greater than 6 for the top of the number bond.
Then, roll the die to determine one of the parts.
Both students write two addition and two subtraction sentences, with a box for the missing number in each equation, and solve for the missing number.
They then exchange personal white boards and check each other's work.

Number Bond Additon and Subtraction (4 min.)

Example:

$5 + \boxed{3} = 8$ $\quad$ $8 - 5 = \boxed{3}$

$\boxed{3} + 5 = 8$ $\quad$ $8 - \boxed{3} = 5$
