Royal High School Title I Targeted Assistance in Math

1. Students are identified for Math I Lab based upon previous classroom and SBA performance.
2. Students are placed into the class based upon a rank file list that is based on previous classroom performance, teacher recommendation, and NWEA scores. Priority is given to upperclassmen.
3. The class covers the same materials as Math I, but gives students two classes per day to help students master concepts. This introduction course of algebra helps students build problem solving skills necessary to move on to additional mathematics courses.
4. Two teachers teach the classes and the students have each teacher for one class period. Each class also has an instructional assistant to provide further assistance. Additionally, students have access to after school tutoring.
5. Parent Engagement includes Title I Information Night where information regarding the classes is presented. Teachers and Parents schedule conferences to discuss student performance.
6. Teachers have received PD in SIOP and other strategies to assist EL and struggling learners. Both teachers attend the Northwest Mathematics Conference in Portland, Oregon. All instructors are highly qualified and certified in mathematics.
