

## ***ONE POINT PERSPECTIVE***

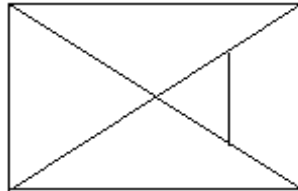

**Step 1:** Draw an "x" (connecting corners) "x" is orthogonal line. "x" where the "x" intersect is the vanishing point

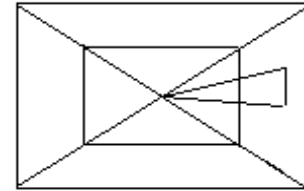

**Step 7:** Drawing a window, Draw a vertical line

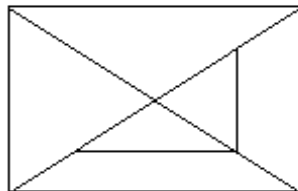

**Step 2:** Draw a vertical line, make sure it is perpendicular to the bottom of the paper

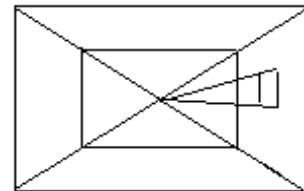

**Step 8:** Draw two orthogonal lines

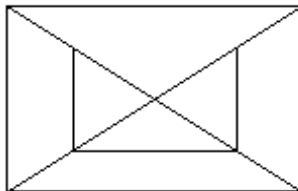

**Step 3:** Draw a horizontal line, make sure it starts at the end of the vertical line

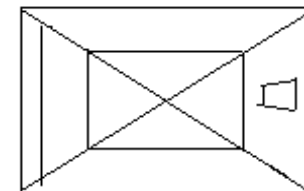

**Step 9:** Draw a vertical line connecting the orthogonal lines at the window ends.

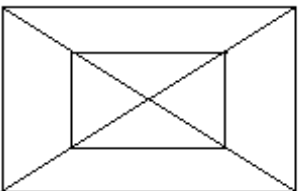

**Step 4:** Draw another vertical line. This line starts at the end of the horizontal line

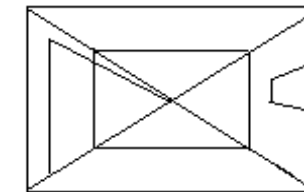

**Step 10:** Erase orthogonal lines at windows end (added window seal by repeating steps 7-10 outside the window)  
**Step 11:** Draw a door, Draw a vertical line opposite of window

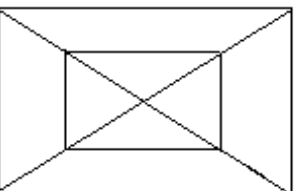

**Step 5:** Back wall  
Draw a horizontal line connecting the two vertical lines you now have the back wall and a room.

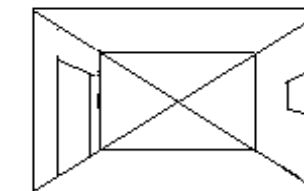

**Step 12:** Draw top orthogonal line slightly below "x"

**Step 6:** Decide what interior space you want to design. Bedroom, livingroom, bathroom, kitchen, den, etc.....

**Step 13:** Draw vertical line connecting orthogonal + bottom of "x" (add door frame by repeating steps 11-13 on outside of door)

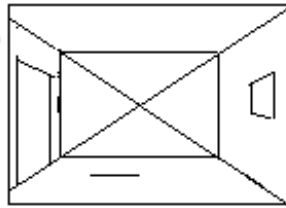

# ONE POINT PERSPECTIVE

## Step: 14

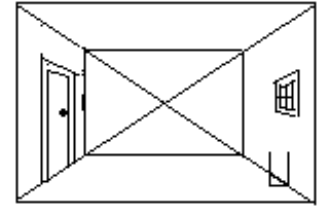

*Drawing a bed.*

*Draw a horizontal line parallel to the bottom of the paper.*

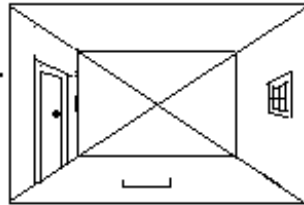

## Step: 20

*Draw a vertical line at the end of the horizontal.*

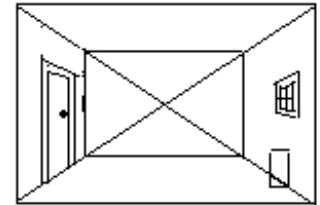

## Step: 15

*Draw two short vertical lines at the ends of the horizontal lines. (This is the height of the bed).*

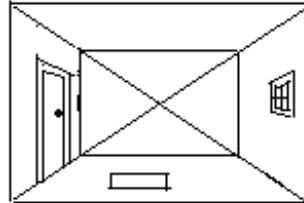

## Step: 21

*Draw a horizontal line connecting the two vertical lines.*

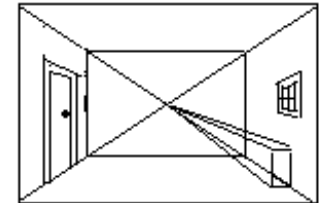

## Step: 16

*Draw a horizontal line connecting the two vertical lines.*

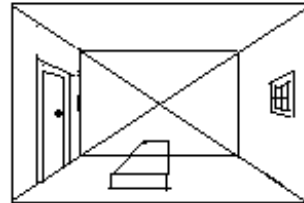

## Step: 22

*Draw three orthogonal lines connecting three corners.*

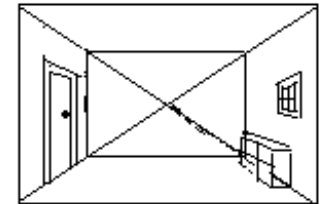

## Step: 17

*Draw orthogonal lines and connect using a horizontal line at the head of the bed. (Add details to the bed. See step 18).*

## Step: 23

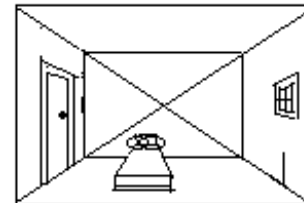

*Draw a vertical line connecting the bottom two orthogonal lines. Draw a horizontal line at the vertical end connecting to top orthogonal (Add details to dresser see step 24) Erase extra orthogonal lines)*

## Step: 18

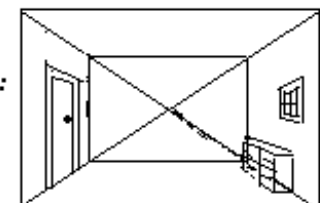

*Drawing a dresser.*

*Draw a vertical line where the floor and the wall meet.*

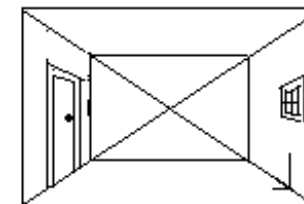

## Step: 24

*Add details to dresser. Continue to add details to room: Pictures, rugs, mirrors, desk, lamp, etc...*

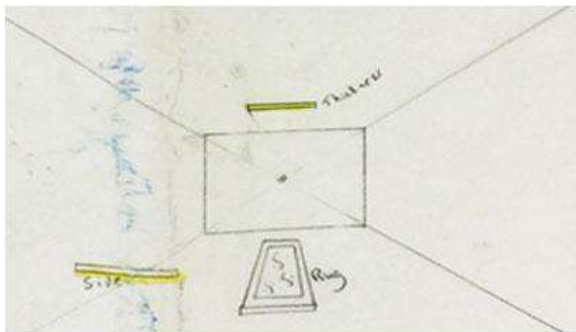

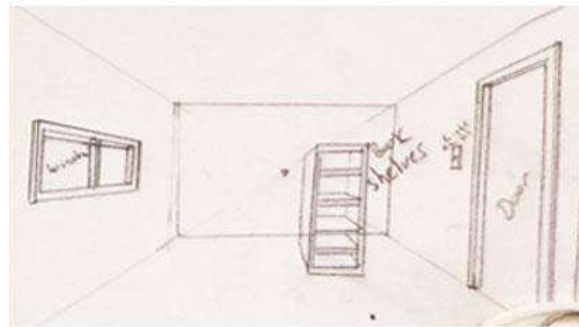

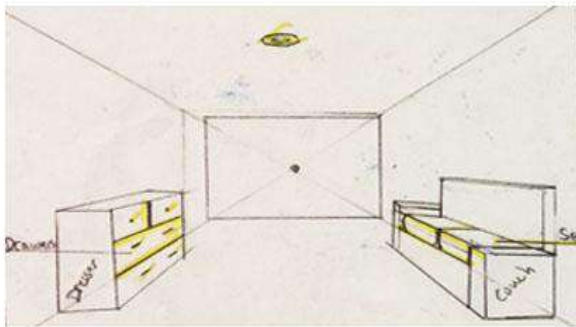

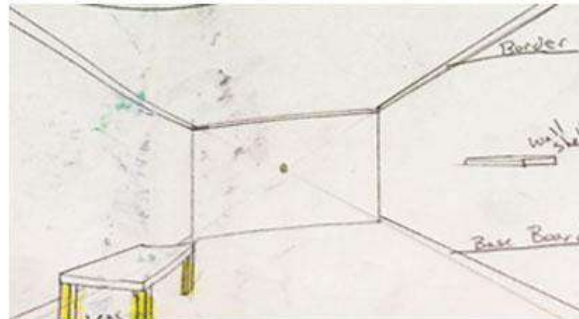

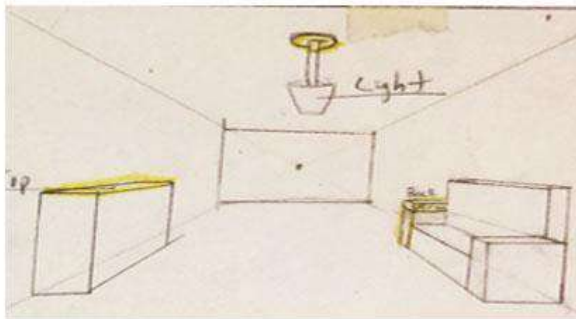

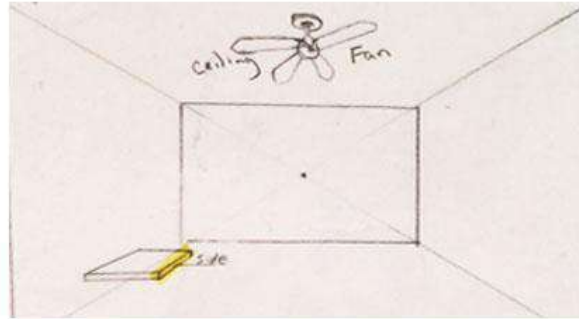

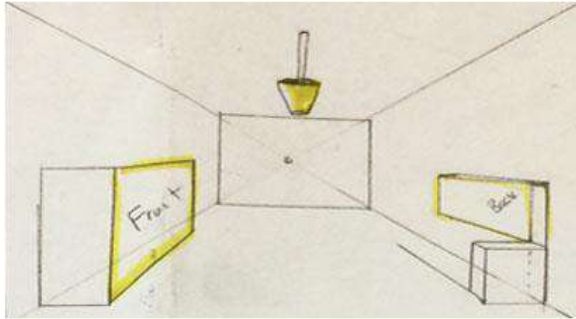

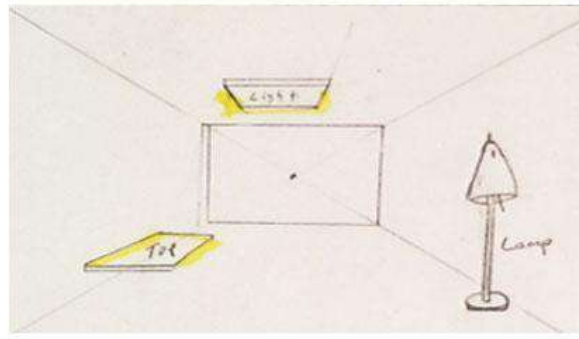

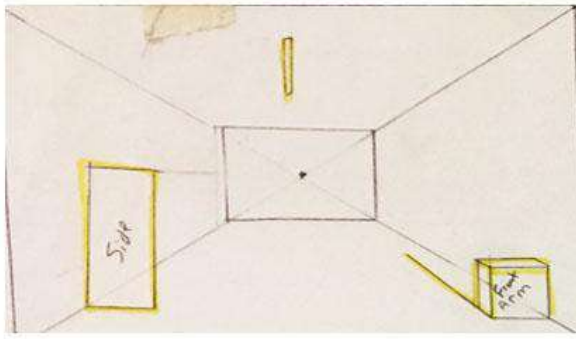

## Step: 19

*Draw a horizontal line at the end of the dresser.*

## ONLY STRUCTURAL LINES USED

1. Vertical lines - squared to paper
2. Horizontal lines - squared to paper
3. Diagonal to vanishing point
