

Eureka Math

2nd Grade Module 3 Lesson 18

At the request of elementary teachers, a team of Bethel & Sumner educators met as a committee to create Eureka slideshow presentations. These presentations are not meant as a script, nor are they required to be used. Please customize as needed. Thank you to the many educators who contributed to this project!

Directions for customizing presentations are available on the next slide.

Reflecting your Teaching Style and Learning Needs of Your Students

- When the Google Slides presentation is opened, it will look like Screen A.
- Click on the “pop-out” button in the upper right hand corner to change the view.
- The view now looks like Screen B.
- Within Google Slides (not Chrome), choose FILE.
- Choose MAKE A COPY and rename your presentation.
- Google Slides will open your renamed presentation.
- It is now editable & housed in MY DRIVE.

Application Problem

For an art project, Daniel collected 15 fewer maple leaves than oak leaves. He collected 60 oak leaves. How many maple leaves did he collect?

The handwritten work is enclosed in a rectangular box. At the top, there are two columns of circles. The left column, labeled "Oak" below it, contains 6 circles. The right column, labeled "Maple" below it, contains 5 circles, with the top circle crossed out and the number "5" written next to it. Below the diagram, the calculation $60 - 15 = 45$ is written. At the bottom, the sentence "Daniel collected 45 Maple leaves." is written.

Oak Maple

$60 - 15 = 45$

Daniel collected 45 Maple leaves.

Concept Development

Slide the place value chart inside your personal white boards.

--	--	--

Partner A, show 2 hundreds 12 ones on your place value chart. Partner B, show 15 tens 4 ones.

Concept Development

My number was 103.

<div data-bbox="205 848 362 1001"><p>100</p></div>		<div data-bbox="1805 889 1961 1042"><p>1</p></div> <div data-bbox="1805 1079 1961 1232"><p>1</p></div> <div data-bbox="1805 1269 1961 1422"><p>1</p></div>
--	--	--

Compare numbers with your partner and me.

Concept Development

What's the smallest, or least number?

The greatest?

Write the three numbers from least to greatest on your personal white boards. Use standard form. At the signal, show your boards.

Concept Development

Now Partner A, change to show 6 hundreds, 2 tens, and 4 ones.

Partner B, change to show 4 ones 6 hundreds.

Concept Development

My number was 642.

<div>100</div> <div>100</div> <div>100</div> <div>100</div> <div>100</div>	<div>10</div> <div>10</div> <div>10</div> <div>10</div>	<div>1</div> <div>1</div>
--	---	---------------------------

Now, compare. Write the numbers from least to greatest on your boards.

Concept Development

Now Partner A, change to show $5+300+30$.

Partner B, change to show $50+3+300$

Concept Development

My number is:

Five hundred thirty-three

Compare our numbers. This time write them from GREATEST to LEAST on your boards.

Concept Development

Now Partner A, change to show 30 tens+7tens

Partner B, change to show 29 tens+8 tens

Concept Development

My number is:

Three hundred seventy

Compare our numbers. Write them using the symbols $<$, $>$, or $=$ to make a number sentence.

Concept Development

I am now going to assign you groups by counting off as A, B, C, or D. You can write your letter on your board so you don't forget.

Think of a number and draw it on your place value chart in the way that you choose.

Use hundreds, tens, and ones or any combination of those you'd like. Take about one minute.

A's- write your number in standard form below your drawing.

B's- write your number in standard form

C's- write them in word form

D's- write them in expanded form

Concept Development

Work with your partner to order these three numbers from least to greatest on your white board.

Let's read the numbers in order
