

Some students partitioned a rectangular cake in different ways.

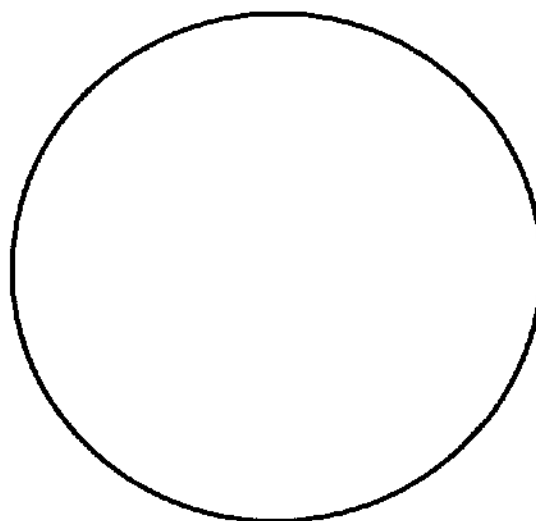

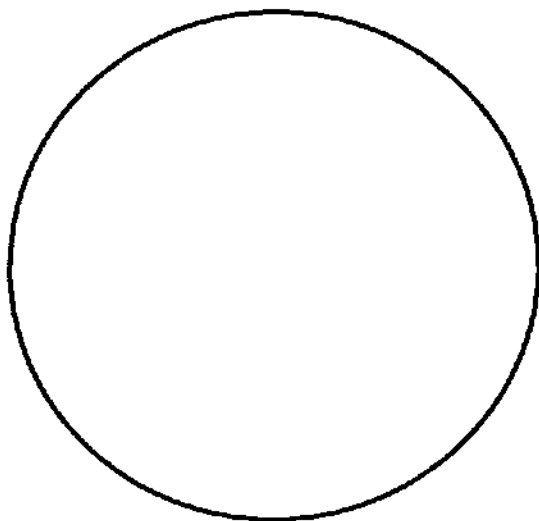

Circle each cake that is correctly partitioned into fourths.

Explain your reasoning.

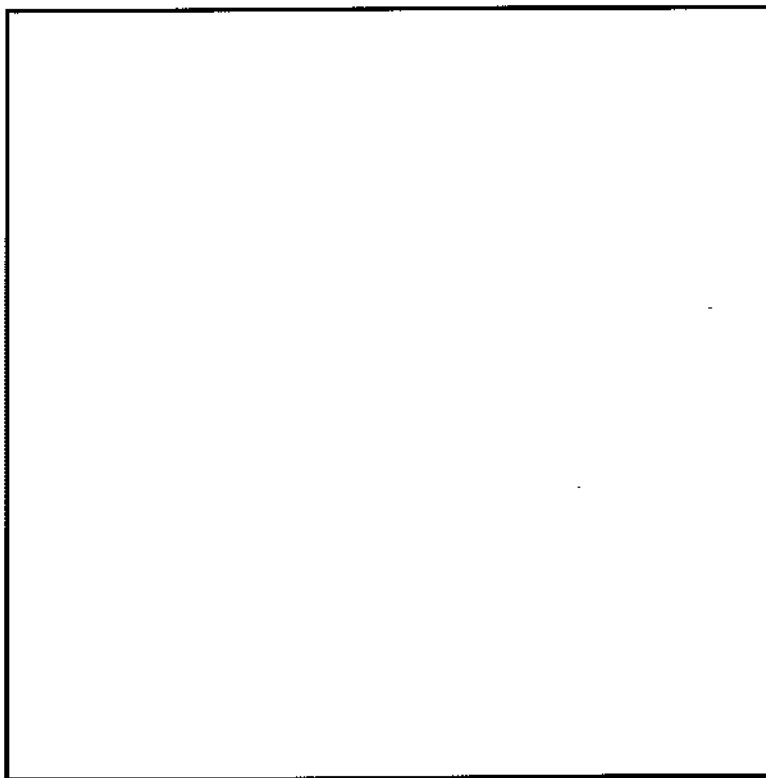

You have 2 round cookies.

Cut each cookie into fourths in two different ways.

Explain how you know that each cookie has been partitioned into fourths.

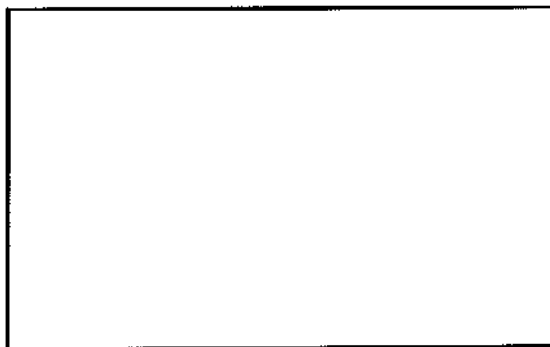

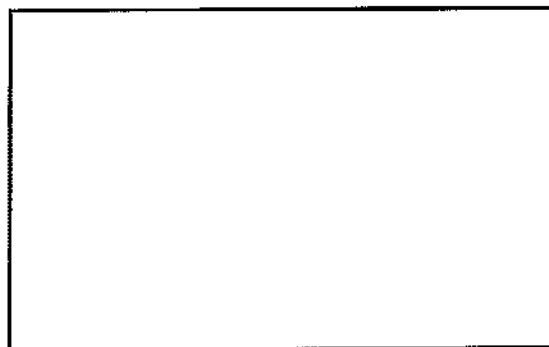

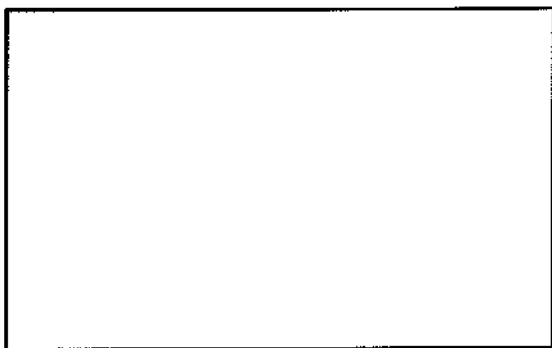

Partition the rectangle into 2 rows and 2 columns of same-size squares.

How many same size squares do you have? _____

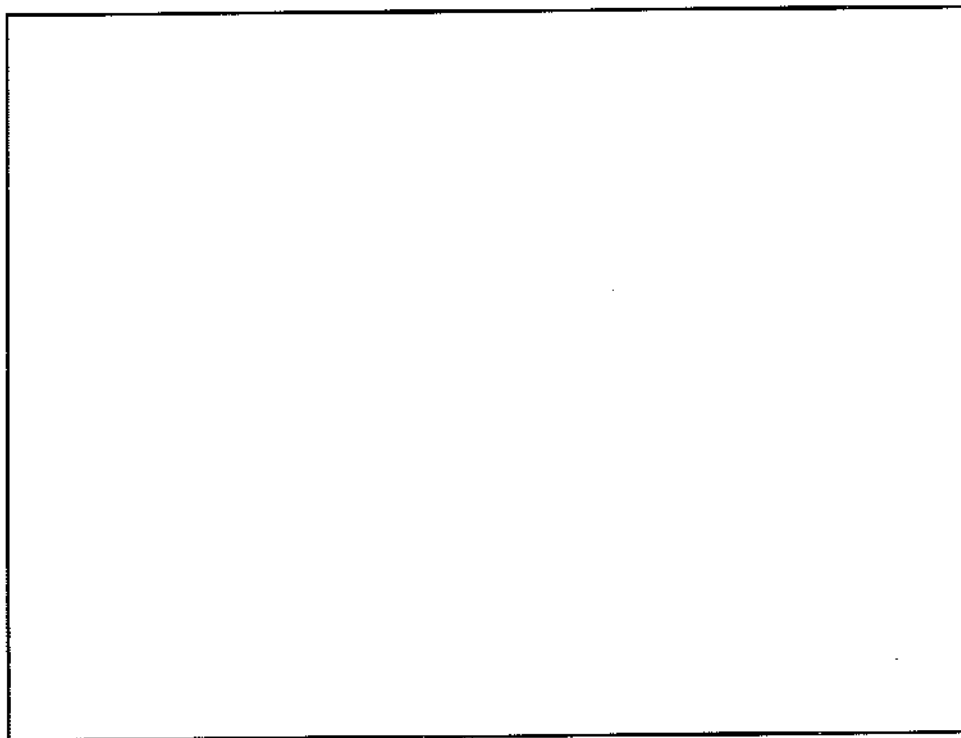

You have 3 rectangular cakes.

Cut each cake into fourths in three different ways.

Explain how you know that each cake has been partitioned into fourths.

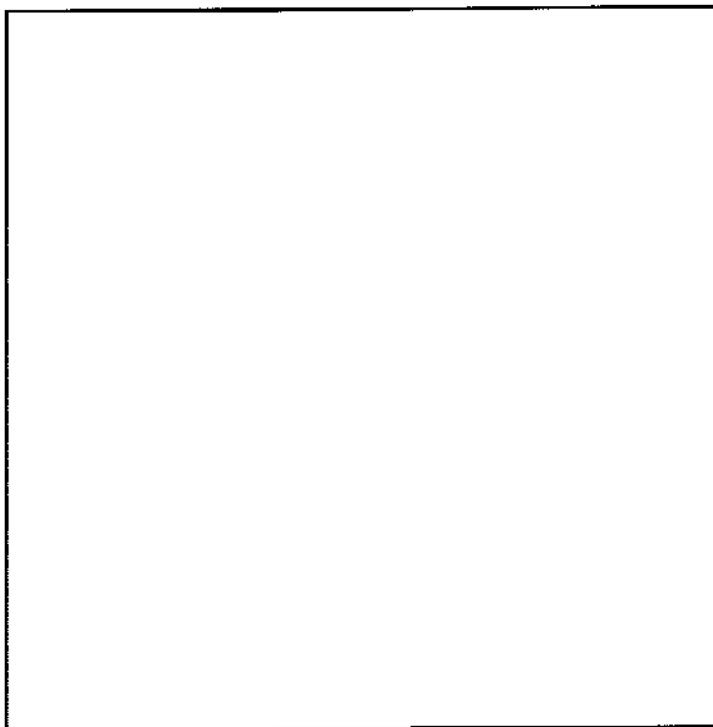

**Partition the rectangle into 3 rows and 4 columns of same-size squares.
How many squares do you have?**

How many same size squares do you have? _____

Name _____

Partition the rectangle into 2 rows and 2 columns of same-size squares.

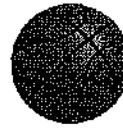

How many same-size squares do you have? _____

Name _____ Date: _____ Number _____

Searching for Shapes

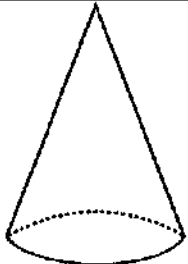

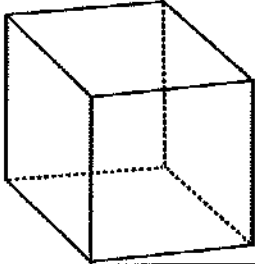

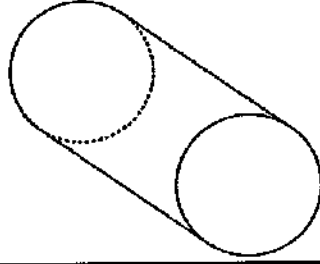

Directions: Find three 2D shapes and three 3D shapes in the classroom. Draw and label them by name and shape on the correct side of the T chart as shown.

2D shapes**envelope (rectangle)****3D shapes****basketball (sphere)**

Name: _____ Date: _____

Geometrical Shapes

Directions: Cut the words below and match them to their correct shape. Count and write the number of faces, edges, and vertices for each shape.

1. 	2. 	3. 

Number of Faces: _____

Number of Edges: _____

Number of Vertices: _____

Number of Faces: _____

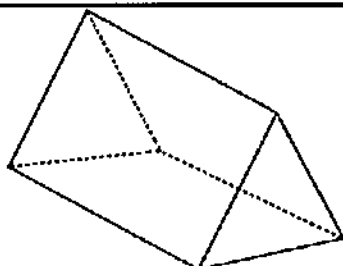

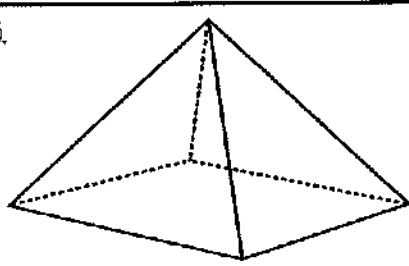

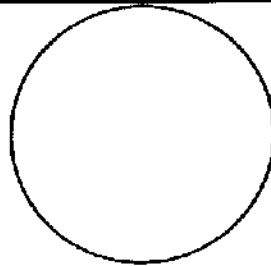

Number of Edges: _____

Number of Vertices: _____

Number of Faces: _____

Number of Edges: _____

Number of Vertices: _____

4. 	5. 	6. 

Number of Faces: _____

Number of Edges: _____

Number of Vertices: _____

Number of Faces: _____

Number of Edges: _____

Number of Vertices: _____

Number of Faces: _____

Number of Edges: _____

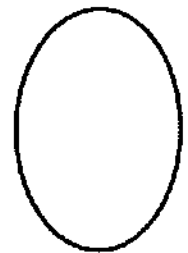

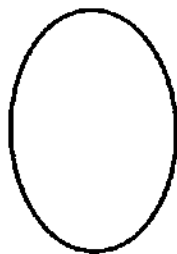

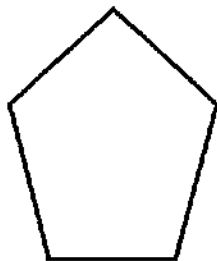

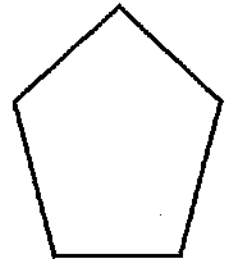

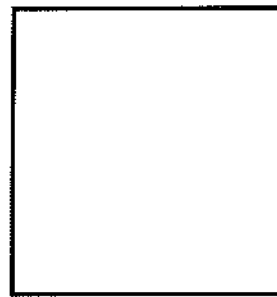

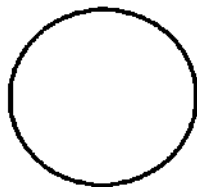

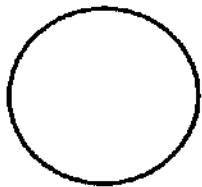

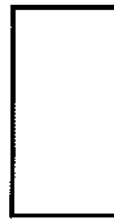

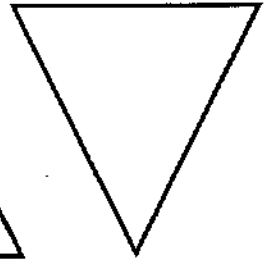

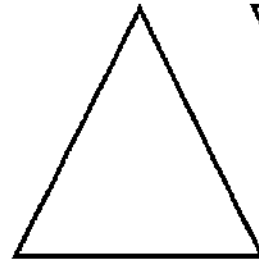

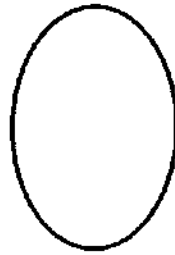

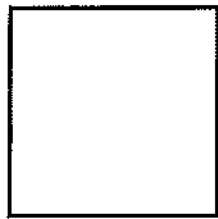

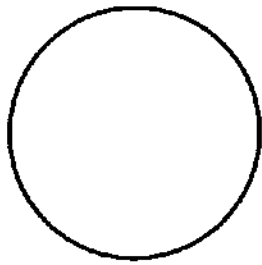

Number of Vertices: _____

Prism	Sphere	Cone
Cube	Pyramid	Cylinder

Make a Picture

Use these shapes to make a picture! Cut them out
You can draw more if you need to.

Graphing Shapes

Look at your picture. How many....

Squares?

Rectangles?

Triangles?

Circles?

Ovals?

Pentagons?

Can you graph it?
