

Your partner thinks of something. As the machine asks questions, write down what it asks, their answer and what that means with regards to narrowing down what their "animal" "vegetable" or "mineral" could be. See if you can make a claim before the machine does.

| Question                      | Answer | Which Means                       |
|-------------------------------|--------|-----------------------------------|
| Is it Animal?                 | No     | It has to be vegetable or mineral |
| Is it Vegetable?              | No     | It has to be mineral              |
| Is it Mineral?                | Yes    | It is Mineral                     |
| Is it bigger than a breadbox? | No     | It is smaller than a breadbox     |
|                               |        |                                   |
|                               |        |                                   |
|                               |        |                                   |
|                               |        |                                   |
|                               |        |                                   |
|                               |        |                                   |

| Question | Answer | Which Means |
|----------|--------|-------------|
|          |        |             |
|          |        |             |
|          |        |             |
|          |        |             |
|          |        |             |
|          |        |             |
|          |        |             |
|          |        |             |
|          |        |             |
|          |        |             |
|          |        |             |
|          |        |             |
|          |        |             |

| Claim | Evidence | Reasoning |  |
|-------|----------|-----------|--|
|       |          |           |  |
|       |          |           |  |
|       |          |           |  |
|       |          |           |  |
|       |          |           |  |
|       |          |           |  |
