

Date:

Dear Parent,

You have expressed interest in finding a volunteer student tutor from Hamilton High School to assist your child. All students listed have submitted an application with teacher recommendations and grade verification. Please know that staff members are not able to recommend or endorse any specific student. We are only providing the information. Parents/guardians can reach out to the student to determine if it is an appropriate match. Parents are also responsible for determining the logistics of when and where the students would meet.

Your signature below verifies that the parameters of this tutoring arrangement have been understood.

If you have any questions, please contact your child's school counselor.

I understand that the Hamilton School District does not have a formal in-school peer tutoring program and is only providing the name and phone number of students who have expressed a willingness to tutor other students. I further understand that it is my responsibility as a parent to determine if the match is appropriate and arrange the logistics of the tutoring relationship.

Name of child to be tutored: _____

Signature of parent: _____

Date: _____

Please return this form to your child's school counselor
