2020 New Jersey Student Learning Standards for Social Studies (3-5)

2020 New Jersey Student Learning Standards for Social Studies (6-8)

Social Studies

The ever-changing landscape of information and communication technologies have transformed the roles and responsibilities of the next generation of learners. Inquiry-based learning in social studies prepares students to produce and critically consume information in our global society. This document outlines social studies practices, disciplinary concepts, core ideas, and related performance expectations in a manner that promotes learning experiences in which students actively explore the past, present, and future of the world through the study of history, economics, civics, and geography.

Mission

Social studies education provides learners with the knowledge, skills, attitudes, and perspectives needed to become active, informed, and contributing members of local, state, national, and global communities.

Vision

An education in social studies fosters a population that:

- Is civic-minded, globally aware, and socially responsible;
- Exemplifies fundamental values of democracy and human rights through active participation in local, state, national, and global communities;
- Makes informed decisions about local, state, national, and global events based on inquiry and analysis;
- Considers multiple perspectives, values diversity, and promotes cultural understanding;
- Recognizes the relationships between people, places, and resources as well as the implications of an interconnected global economy;
- Applies an understanding of critical media literacy skills when utilizing technology to learn, communicate, and collaborate with diverse people around the world; and
- Discerns fact from falsehood and critically analyzes information for validity and relevance.

Intent and Spirit of the Social Studies Standards

All students receive social studies instruction from Kindergarten through grade 12. Today's challenges are complex, have global implications, and are connected to people, places, and events of the past. The study of social studies focuses on deep understanding of concepts that enable students to think critically and systematically about local, regional, national, and global issues. Authentic learning experiences that enable students to apply content knowledge, develop social studies skills, and collaborate with students from around the world prepare New Jersey students for college, careers, and civic life. The natural integration of technology in social studies education allows students to overcome geographic borders,

apply scientific and mathematical analysis to historical questions and contemporary issues, appreciate cultural diversity, and experience events through the examination of primary sources. The 2020 New Jersey Student Learning Standards – Social Studies (NJSLS-2020) are informed by national and state standards and other documents such as the College, Career, and Civic Life (C3) Framework for Social Studies State Standards, as well as those published by the National Center for History Education, National Council for Social Studies, National Council for Geographic Education, Center for Civic Education, National Council on Economic Education, National Assessment of Educational Progress, and the Partnership for 21st Century Skills. Social studies instruction occurs throughout the K-12 spectrum, building in sophistication of learning about history, economics, geography, and civics at all ages.

Revised Standards

Framework for NJ Designed Standards

The design of this version of the NJSLS-SS is intended to:

- promote the development of curricula and learning experiences that reflect the vision and mission of social studies as stated in the beginning of this document;
- foster greater coherence and increasingly complex understanding of social studies knowledge, skills, attitudes, and perspectives across grade bands;
- establish meaningful connections among the major areas of study within social studies;
- prioritize the important ideas and core processes that are central to social studies and have lasting value beyond the classroom; and
- reflect the habits of mind central to social studies that lead to post-secondary success.

Social Studies Practices

The practices are the skills that individuals who work in the field of social sciences use on a regular basis. Because the purpose of social studies is to provide students with the knowledge, skills and attitudes they need to be active, informed, responsible individuals and contributing members of their communities, many of the practices can be applied to daily life. Curriculum writers and educators will want to consider how they can design learning experiences that will enable their students to develop these skills in conjunction with the content knowledge reflected in the core ideas and performance expectations (Citizens, 2008).

Practice	Description
Developing Questions and Planning Inquiry	Developing insightful questions and planning effective inquiry involves identifying the purposes of different questions to understand the human experience, which requires addressing real world issues. Inquiries incorporating questions from various social science disciplines build understanding of the past, present and future; these inquiries investigate the complexity and diversity of individuals, groups, and societies.
Gathering and Evaluating Sources	Finding, evaluating and organizing information and evidence from multiple sources and perspectives are the core of inquiry. Effective practice requires evaluating the credibility of primary and secondary sources, assessing the reliability of information, analyzing the context of information, and corroborating evidence across sources. Discerning opinion from fact and interpreting the significance of information requires thinking critically about ourselves and the world.
Seeking Diverse Perspectives	Making sense of research findings requires thinking about what information is included, whether the information answers the question, and what may be missing, often resulting in the need to complete additional research. Developing an understanding of our own and others' perspectives builds understanding about the complexity of each person and the diversity in the world. Exploring diverse perspectives assists students in empathizing with other individuals and groups of people; quantitative and qualitative information provides insights into specific people, places, and events, as well as national, regional, and global trends.
Developing Claims and Using Evidence	Developing claims requires careful consideration of evidence, logical organization of information, self-awareness about biases, application of analysis skills, and a willingness to revise conclusions based on the strength of evidence. Using evidence responsibly means developing claims based on factual evidence, valid reasoning, and a respect for human rights
Presenting Arguments and Explanations	Using a variety of formats designed for a purpose and an authentic audience forms the basis for clear communication. Strong arguments contain claims with organized evidence and valid reasoning that respects the diversity of the world and 5 Page Practice Description the dignity of each person. Writing findings and engaging in civil discussion with an audience provides a key step in the process of thinking critically about conclusions and continued inquiry.
Engaging in Civil Discourse and Critiquing Conclusions	Assessing and refining conclusions through metacognition, further research, and deliberative discussions with diverse perspectives sharpens the conclusions and improves thinking as a vital

	part of the process of sensemaking. Responsible citizenship requires respectfully listening to and critiquing claims by analyzing the evidence and reasoning supporting them. Listening to and understanding contrary views can deepen learning and lay the groundwork for seeking consensus.
Taking Informed Action	After thoroughly investigating questions, taking informed action means building consensus about possible actions and planning strategically to implement change. Democracy requires citizens to practice discussion, negotiation, coalition seeking, and peaceful conflict resolution. When appropriate, taking informed action involves creating and/or implementing action plans designed to solve problems and create positive change.

Standards in Action:

Climate Change At the core of social studies education, is the goal to prepare students with the essential knowledge and skills to make their local and global communities a better place to live. The intent is for students to begin developing the requisite skills – information gathering and analysis, inquiry and critical thinking, communication, data analysis, and the appropriate use of technology and media – at the youngest grades for the purpose of actively engaging with complex problems and learning how to take action in appropriate ways to confront persistent dilemmas and address global issues.

As an example, leveraging climate change as an area of focus, provides an opportunity to design authentic learning experiences that are integrative of the disciplines within social studies, addresses an issue that has persisted across time and space, connects the past to the present and future, and leverages the use of disciplinary literacy skills to communicate their ideas and solutions for change. A well-designed social studies program addresses the totality of the human experience over time and space, and provides opportunities for students to engage in inquiry, develop and display data, synthesize findings, and make judgments. The NJSLS-SS provide a foundation for this type of learning. For example, the impact of human interactions on the environment is central to any course involving geographic concepts. However, new to this set of standards is a more intentional focus on addressing issues related to climate change. The intent is to foster learning experiences which involve students asking their own questions, seeking the perspectives of multiple stakeholders with diverse points of view, using geospatial technologies to gather data; all for the purpose of planning/proposing advocacy projects or analyzing current public policy regarding climate change and determining its effectiveness. Many of the standards that relate to climate change can be found in Standard 6.3, Active Citizenship in the 21st Century. Additionally, the Human Environment Interaction disciplinary concept and its associated performance expectations provide opportunities for students to engage with this topic.

Structure of the NJSLS-SS

The organization and content of the 2020 NJSLS-SS reflects N.J.A.C. 6A:8-5.1(a)1.iv., which requires at least 15 credits in social studies, including satisfaction of N.J.S.A. 18A:35-1 and 2; five credits in world history; and the integration of civics, economics, geography, and global studies content

in all courses (N.J.A.C 6A:8-5.1 (a) 1). In addition, there are performance expectations which reflect the Amistad and Holocaust mandates in all grade bands. There are three social studies standards:

- 6.1 U.S. History: America in the World: All students will acquire the knowledge and skills to think analytically about how past and present interactions of people, cultures, and the environment shape the American heritage. Such knowledge and skills enable students to make informed decisions that reflect fundamental rights and core democratic values as productive citizens in local, national, and global communities. Standard 6.1 U.S. History: America in the World applies to grades K–12; at the K–2 and 3–5 levels, content is organized by disciplinary concepts. The strands and disciplinary concepts are incorporated in the alphanumeric code.
- 6.2 World History/Global Studies: All students will acquire the knowledge and skills to think analytically and systematically about how past interactions of people, cultures, and the environment affect issues across time and cultures. Such knowledge and skills enable students to make informed decisions as socially and ethically responsible world citizens in the 21st century. Standard 6.2 World History/Global Studies applies only to grades 5–12; at both the 5–8 and 9–12 levels, content organized by era. The strands and disciplinary concepts are incorporated in the alphanumeric code.
- 6.3 Active Citizenship in the 21st Century: All students will acquire the skills needed to be active, informed citizens who value diversity and promote cultural understanding by working collaboratively to address the challenges that are inherent in living in an interconnected world. Standard 6.3 Active Citizenship in the 21st Century applies to grades K–12; at the K–2 and 3–5 levels, content is organized by disciplinary concepts. The strands and disciplinary concepts are incorporated in the alphanumeric code.

The core ideas are derived from the disciplinary concepts and students’ understandings increase in sophistication over time as they engage with these ideas in new and varied contexts. The core ideas are what is most essential for students to learn and represent the knowledge and skills that they should be able to apply to new situations outside of the school experience. Curriculum writers and educators can use these core ideas as the basis for formative, summative, and benchmark assessments.

The performance expectations describe what students should know and be able to do. It is expected that curriculum writers and educators will bundle these performance expectations together in meaningful ways as a basis for classroom instruction and to guide the creation of formative, summative, and benchmark assessments.

Unit 1 Fall of Rome Curriculum Area: Social Studies Unit Length: 5 weeks	Grade Level: 7
Unit Overview	
<p>Students will acquire the knowledge and skills to understand the impact of the Roman Empire and how its decline defined the empire and impacted the world. Students will build upon knowledge they learned in 6th grade to assess the short term and long term impact of the achievements of the</p>	

Roman Empire. The students will evaluate how these achievements of Ancient Rome led other civilizations to style their civilizations after them. The students will use primary and secondary sources to determine how the decline of the Roman Empire was due to several varying factors such as a corrupt government, outside invasion, and the rise of Eastern Empires. Students will analyze their decline and compare them to other civilizations they have previously learned about. This unit will be the building block for a civilizations achievements and shortcomings as students travel through world history.

Interdisciplinary Connections

English/Literacy:

W.8.1. Write arguments to support claims with clear reasons and relevant evidence.

W.8.2. Write informative/explanatory texts to examine a topic and convey ideas, concepts, and information through the selection, organization, and analysis of relevant content.

RH.6-8.1 Cite specific textual evidence to support analysis of primary and secondary sources.

RH.6-8.2 Determine the central ideas or information of a primary or secondary source; provide an accurate summary of the source distinct from prior knowledge or opinions.

RH.6-8.4 Determine the meaning of words and phrases as they are used in a text, including vocabulary specific to domains related to history/social studies. RH.6-8.7 Integrate visual information (e.g., in charts, graphs, photographs, videos, or maps) with other information in print and digital texts.

RH.6-8.9 Analyze the relationship between a primary and secondary sources on the same topic.

RH.6-8.10 By the end of grade 8, read and comprehend history/social studies texts in the grades 6-8 text complexity band independently and proficiently. WHST.6-8.2 Write informative/explanatory texts, including the narration of historical events, scientific procedures/ experiments, or technical processes. WHST.6-8.4 Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.

WHST.6-8.6 Use technology, including the Internet, to produce and publish writing and present the relationships between information and ideas clearly and efficiently.

WHST.6-8.7 Conduct short research projects to answer a question (including a self-generated question), drawing on several sources and generating additional related, focused questions that allow for multiple avenues of exploration.

WHST.6-8.9 Draw evidence from informational texts to support analysis, reflection, and research.

WHST.6-8.10 Write routinely over extended time frames (time for reflection and revision) and shorter time frames (a single sitting or a day or two) for a range of discipline-specific tasks, purposes, and audiences.

SL.8.1 Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 8 topics, texts, and issues, building on others' ideas and expressing their own clearly.

L.8.1. Demonstrate command of the conventions of standard English grammar and usage when writing or speaking.

NJSLS Computer Science and Design Thinking: All students will use digital tools to access, manage, evaluate, and synthesize information in order to solve problems individually and collaborate and to create and communicate knowledge.

Students will:

Interaction of Technology and Humans

INDICATORS:

- 8.2.8.ITH.1: Explain how the development and use of technology influences economic, political, social, and cultural issues.
- 8.2.8.ITH.2: Compare how technologies have influenced society over time.
- 8.2.8.ITH.3: Evaluate the impact of sustainability on the development of a designed product or system.
- 8.2.8.ITH.4: Identify technologies that have been designed to reduce the negative consequences of other technologies and explain the change in impact.
- 8.2.8.ITH.5: Compare the impacts of a given technology on different societies, noting factors that may make a technology appropriate and sustainable in one society but not in another.

Unit 2: Expanding, Exchanges and Encounters Curriculum Area: Social Studies Unit Length: 12 weeks	Grade Level: 7
Unit Overview	
<p>The emergence of empires (i.e., Asia, Africa, Europe and the Americas) resulted from the promotion of interregional trade, cultural exchanges, new technologies, urbanization, and centralized political organization. The rise and spread of new belief systems unified societies, but they also became a major source of tension and conflict. While commercial and agricultural improvements created new wealth and opportunities for the empires, most people's daily lives remained unchanged. Students will use the social studies practices listed to discover how the expanding, exchanging and encounters during these time periods impact the global world.</p>

Interdisciplinary Connections

English/Literacy:

W.8.1. Write arguments to support claims with clear reasons and relevant evidence.

W.8.2. Write informative/explanatory texts to examine a topic and convey ideas, concepts, and information through the selection, organization, and analysis of relevant content.

RH.6-8.1 Cite specific textual evidence to support analysis of primary and secondary sources.

RH.6-8.2 Determine the central ideas or information of a primary or secondary source; provide an accurate summary of the source distinct from prior knowledge or opinions.

RH.6-8.4 Determine the meaning of words and phrases as they are used in a text, including vocabulary specific to domains related to history/social studies. RH.6-8.7 Integrate visual information (e.g., in charts, graphs, photographs, videos, or maps) with other information in print and digital texts.

RH.6-8.9 Analyze the relationship between a primary and secondary sources on the same topic.

RH.6-8.10 By the end of grade 8, read and comprehend history/social studies texts in the grades 6-8 text complexity band independently and proficiently. WHST.6-8.2 Write informative/explanatory texts, including the narration of historical events, scientific procedures/ experiments, or technical processes. WHST.6-8.4 Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.

WHST.6-8.6 Use technology, including the Internet, to produce and publish writing and present the relationships between information and ideas clearly and efficiently.

WHST.6-8.7 Conduct short research projects to answer a question (including a self-generated question), drawing on several sources and generating additional related, focused questions that allow for multiple avenues of exploration.

WHST.6-8.9 Draw evidence from informational texts to support analysis, reflection, and research.

WHST.6-8.10 Write routinely over extended time frames (time for reflection and revision) and shorter time frames (a single sitting or a day or two) for a range of discipline-specific tasks, purposes, and audiences.

SL.8.1 Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 8 topics, texts, and issues, building on others' ideas and expressing their own clearly.

L.8.1. Demonstrate command of the conventions of standard English grammar and usage when writing or speaking.

NJSLS Computer Science and Design Thinking: All students will use digital tools to access, manage, evaluate, and synthesize information in order to solve problems individually and collaborate and to create and communicate knowledge.

Social Studies Practices	
<p>Developing Questions and Planning Inquiry</p> <p>Developing insightful questions and planning effective inquiry involves identifying the purposes of different questions to understand the human experience, which requires addressing real world issues. Inquiries incorporating questions from various social science disciplines build understanding of the past, present and future; these inquiries investigate the complexity and diversity of individuals, groups, and societies.</p> <p>Gathering and Evaluating Sources</p> <p>Finding, evaluating and organizing information and evidence from multiple sources and perspectives are the core of inquiry. Effective practice requires evaluating the credibility of primary and secondary sources, assessing the reliability of information, analyzing the context of information, and corroborating evidence across sources. Discerning opinion</p>	

from fact and interpreting the significance of information requires thinking critically about ourselves and the world.

Seeking Diverse Perspectives

Making sense of research findings requires thinking about what information is included, whether the information answers the question, and what may be missing, often resulting in the need to complete additional research. Developing an understanding of our own and others' perspectives builds understanding about the complexity of each person and the diversity in the world. Exploring diverse perspectives assists students in empathizing with other individuals and groups of people; quantitative and qualitative information provides insights into specific people, places, and events, as well as national, regional, and global trends.

Developing Claims and Using Evidence

Developing claims requires careful consideration of evidence, logical organization of information, self-awareness about biases, application of analysis skills, and a willingness to revise conclusions based on the strength of evidence. Using evidence responsibly means developing claims based on factual evidence, valid reasoning, and a respect for human rights.

Presenting Arguments and Explanations

Using a variety of formats designed for a purpose and an authentic audience forms the basis for clear communication. Strong arguments contain claims with organized evidence and valid reasoning that respects the diversity of the world and the dignity of each person. Writing findings and engaging in civil discussion with an audience provides a key step in the process of thinking critically about conclusions and continued inquiry.

Engaging in Civil Discourse and Critiquing Conclusions

Assessing and refining conclusions through metacognition, further research, and deliberative discussions with diverse perspectives sharpens the conclusions and improves thinking as a vital part of the process of sensemaking. Responsible citizenship requires respectfully listening to and critiquing claims by analyzing the evidence and reasoning supporting them. Listening to and understanding contrary views can deepen learning and lay the groundwork for seeking consensus.

Taking Informed Action

After thoroughly investigating questions, taking informed action means building consensus about possible actions and planning strategically to implement change. Democracy requires citizens to practice discussion, negotiation, coalition-seeking, and peaceful conflict resolution. When appropriate, taking informed action involves creating and/or implementing action plans designed to solve problems and create positive change.

Interdisciplinary Connections

English/Literacy:

W.8.1. Write arguments to support claims with clear reasons and relevant evidence.

W.8.2. Write informative/explanatory texts to examine a topic and convey ideas, concepts, and information through the selection, organization, and analysis of relevant content.

RH.6-8.1 Cite specific textual evidence to support analysis of primary and secondary sources.

RH.6-8.2 Determine the central ideas or information of a primary or secondary source; provide an accurate summary of the source distinct from prior knowledge or opinions.

RH.6-8.4 Determine the meaning of words and phrases as they are used in a text, including vocabulary specific to domains related to history/social studies. RH.6-8.7 Integrate visual information (e.g., in charts, graphs, photographs, videos, or maps) with other information in print and digital texts.

RH.6-8.9 Analyze the relationship between primary and secondary sources on the same topic.

RH.6-8.10 By the end of grade 8, read and comprehend history/social studies texts in the grades 6-8 text complexity band independently and proficiently. WHST.6-8.2 Write informative/explanatory texts, including the narration of historical events, scientific procedures/ experiments, or technical processes. WHST.6-8.4 Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.

WHST.6-8.6 Use technology, including the Internet, to produce and publish writing and present the relationships between information and ideas clearly and efficiently.

WHST.6-8.7 Conduct short research projects to answer a question (including a self-generated question), drawing on several sources and generating additional related, focused questions that allow for multiple avenues of exploration.

WHST.6-8.9 Draw evidence from informational texts to support analysis, reflection, and research.

WHST.6-8.10 Write routinely over extended time frames (time for reflection and revision) and shorter time frames (a single sitting or a day or two) for a range of discipline-specific tasks, purposes, and audiences.

SL.8.1 Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 8 topics, texts, and issues, building on others' ideas and expressing their own clearly.

L.8.1. Demonstrate command of the conventions of standard English grammar and usage when writing or speaking.

NJSLS Computer Science and Design Thinking: All students will use digital tools to access, manage, evaluate, and synthesize information in order to solve problems individually and collaborate and to create and communicate knowledge.

Students will:

Interaction of Technology and Humans

INDICATORS:

8.2.8.ITH.1: Explain how the development and use of technology influences economic, political, social, and cultural issues.

8.2.8.ITH.2: Compare how technologies have influenced society over time.

8.2.8.ITH.3: Evaluate the impact of sustainability on the development of a designed product or system.

8.2.8.ITH.4: Identify technologies that have been designed to reduce the negative consequences of other technologies and explain the change in impact.

8.2.8.ITH.5: Compare the impacts of a given technology on different societies, noting factors that may make a technology appropriate and sustainable in one society but not in another.
