- Dr. White presented the athletes with certificates from the Board and congratulated them all individually.

(B) Dr. Cannon Presentation of RTI Data

- Dr. White explained that the Administration and the Board made a substantial investment in Response to Intervention processes by putting things in place to reteach those students who have not learned essential skills. The process offers opportunities to relearn essential skills with classroom teachers and designated Intervention Teachers. Dr. White

introduced Dr. Cannon, Assistant Superintendent, who explained that the Interventionist Teachers from each school will give an update on the data obtained from the first semester of working with Tier 3 students who are New Prairie's most struggling learners. She explained that the Interventionists will also share a success, a challenge, and a need with the Board. Dr. Cannon feels it is vitally important to New Prairie students to keep the Interventionist positions at each school permanently past the 3 years of the Grant funding.

- Dr. White thanked everyone for organizing the data and presenting this evening. Dr. White said it is good to see tangible results with the investment that has been made, which is grant funded at this point. Dr. White went on to explain that the long-term funding of the Interventionist positions will be a task that is critical to keep this program going for kids beyond the grant funding with the positive results presented. He went on to say that international research is very clear that the Response to Intervention process has a real impact on student learning that can't be disputed and we are seeing it play out in our schools already. Dr. White stated that it was great to hear all the teachers here tonight from each school say they are thrilled and excited to be doing the right work for kids.
