LET'S ROCK

ROCORI MIDDLE SCHOOL!

Middle school is...

- Time to try new things
- Meet new people and make new friends
- Expand your knowledge
- Develop your skills
- Have fun and be creative

A collage of various mathematical symbols and numbers, including π , e , ∞ , $\sqrt{2}$, $0.999... = 1$, $2 > -3$, 3.14 , 5^2 , $1 + 2 \cdot 3$, $(1 - 2) + 3$, $101_2 = 5_{10}$, $5(2+2)$, $+/-$, \times/\div , and $+$. The symbols are arranged in a dense, overlapping pattern.

-

A word cloud featuring various terms related to the scientific method. The words are arranged in a circular pattern, with 'scientific method' being the largest and most central. Other prominent words include 'hypothesis', 'experiment', 'observation', 'conclusion', 'predict', 'variables', 'research', 'question', and 'data'. The words are in different colors and orientations, creating a dynamic visual effect.

SPARTAN TIME

- Meets every day after lunch
- Character education activities
- Social Connections
- Reading and academic check in's
- FUN!

DROP IN CENTER

- Hours: 3:05-6:00 P.M Monday – Thursday

MATH PLACEMENT & PROGRESSION

The first step in providing a meaningful education for student is the determination of appropriate coursework. The faculty of ROCORI schools will utilize data gained from student records to determine the appropriate placement of students in core academic subjects. The school's Response to Intervention (RtI) Team has an objective data-driven process to place students in the appropriate core courses.

Math Course Progression: Many students and parents are concerned with math course placement in the middle school and how it translates to future opportunities in the high school. The chart below identifies the typical progression of math courses in the different tracks. Students who qualify to take pre-algebra in grade 6, algebra in grade 7, and geometry in grade 8 have consistently performed at or above the 90th percentile on standardized assessments, including their three most recent standardized assessments. RMS uses data from assessment results and trends for individual students when placing them math courses. RMS uses data from the Minnesota Comprehensive Assessments (MCAs) and the STAR test.

ACADEMIC INTERVENTIONS

- **Math and Reading SOAR Classes**
 - The Response to Intervention (RTI) Team has established a data-based process for determining the placement of students in SOAR. To be assigned a SOAR class, a student will have performed “below the benchmark” on a standardized assessment. Selection criteria will change as new assessments are adopted by the RMS/District RTI Committee.
